SP 1A-21 Wetel Product picture may differ from actual product Product No.: 08001K21 Submersible borehole pump, suitable for pumping clean water. Can be installed vertically or horizontally. Al components are made in stainless steel, EN 1.4301 (AISI 304), that ensures high corrosive resistance. This carries diriking water approval. The pump is fitted with a 0.55 kW MS402 motor with sand shield, lip seal, water-lubricated journal bearings volume compensating diaphragm. The motor is a canned type submessible motor offering good mechanical stability and high efficiency. Suitable for temperatures up to 40 °C. The motor is not fitted with a temperature sensor. If temperature monitoring is desired, a Pt1000 sensor car fitted. The pump is suitable for applications similar to the following: • raw-water supply • imgation • groundwater lowering • pressure boosting • foundater product details All pump surfaces that are in contact with pumped liquids are made in stainless steel which makes them co and wear-resistant. The corrosion diagram below shows the capabilities of the pump and motor in relation t temperature in Celsius (v-axis) and the concentration of chiride in ppm (x-axis). ************************************				05/11/2020	
Notel Product picture may differ from actual product Product No.: 08001K21 Submersible borehole pump, suitable for pumping clean water. Can be installed vertically or horizontally, Al components are made in stainless steel, EN 1.4301 (AISI 304), that ensures high corrosive resistance. This carries drinking water approval. The pump is fitted with a 0.55 kW MS402 motor with sand shield, lip seal, water-lubricated journal bearings volume compensating diaphragm. The motor is a canned type submersible motor offering good mechanical stability and high efficiency. Suitable for temperatures up to 40 °C. The motor is not fitted with a 0.55 kW MS402 motor with sand shield, lip seal, water-lubricated journal bearings volume compensating diaphragm. The motor is a canned type submersible motor offering good mechanical stability and high efficiency. Suitable for temperatures up to 40 °C. The motor is not fitted with a 160 km (DOL). <b>Further product details</b> The pump is suitable for applications similar to the following: • raw-water supply • irrigatio • groundwater lowering • groundwater lowering • groundwater lowering • groundwater lowering • tountain applications. <b>Pump</b> All pump surfaces that are in contact with pumped liquids are made in stainless steel which makes them co and wear-resistant. The corrosion diagram below shows the capabilities of the pump and motor in relation t imperature in celsius (y-axis) and the concentration of choride in pum (y-axis).	on
