1	Description					
	SP 3A-6					
	GRUNDFOS X					
	Note! Product picture	e may differ from act	ual product			
	Product No.: 10001K06					
	Submersible borehole pump, suitable for pumping cle components are made in stainless steel, EN 1.4301 (carries drinking water approval	an water. Can be AISI 304), that er	e installed vertically or horizontally. All stee nsures high corrosive resistance. This pur			
	carries drinking water approval.					
	The pump is fitted with a 0.37 kW MS402 motor with sand shield, lip seal, water-lubricated journal bearings and a volume compensating diaphragm. The motor is a canned type submersible motor offering good mechanical stability and high efficiency. Suitable for temperatures up to 40 °C.					
	The motor is not fitted with a temperature sensor. If te	-	toring is desired a Pt1000 sensor can be			
	fitted.					
	The motor is for direct-on-line starting (DOL).					
	Further product details					
Ţ	The pump is suitable for applications similar to the following:					
		ionnig.

Description					
Motor					
The stator is hermetically encapsulated in stainless steel and the windings are embedded in polymer compoun This results in high mechanical stability, optimum cooling and reduces the risk of short circuits in the windings.					
The shaft seal is of the lip seal type characterised by low friction against the rotor shaft. The NBR elastomer of good wear resistance, good elasticity and resistance to particles. The rubber material is approved for use in potable water.					
The motor can be fitted with a Pt100 or Pt1000 sensor that together with a control unit ensures that the maximu operating temperature conditions are not exceeded.
