;	Submersible borehole pump, suitable for pum	ping clean water. Can	be installed vertically	y or horizontally. All st		
	components are made in stainless steel, EN ′ carries drinking water approval.	1.4301 (AISI 304), that	ensures nigh corros	ive resistance. This pl		
	The pump is fitted with a 5.5 kW MS4000 mot	tor with sand shield. m	echanical shaft seal.	water-lubricated iourr		
	bearings and a volume compensating diaphra	agm. The motor is a ca	nned type submersik	le motor offering good		
	mechanical stability and high efficiency. Suitable for temperatures up to 40 °C.					
The motor is fitted with the Grundfos Tempcon sensor that, by use of powerline communication together with a MP204 control panel, enables temperature monitoring

Qty. | Description

The elastomer parts in the pump are made of NBR (Nitrile-Butadiene Rubber) which ensures good wear resistance and long service intervals.

In case the pump is used for pumping water with high content of hydrocarbons or solvents, Grundfos offers FKM rubber parts (Fluorocarbon) which are oil and temperature-resistant up to 90 °C.

Date:

The pump is built with octagonal bearings with sand flush channels that minimise wear. As wear of the pump is inevitable, the pump design allows for easy replacement of all internal wear parts (bearings, impeller, wear rings and seal rings) to maintain high performance and a long lifetime.

The suction interconnector is fitted with a strainer to prevent large particles from entering the pump. The suction interconnector is designed to comply with NEMA standards for motor mounting/dimensions.

Motor

The stator is hermetically encapsulated in stainless steel and the windings are embedded in polymer compound. This results in high mechanical stability, optimum cooling and reduces the risk of short circuits in the windings.

The shaft seal is a tungsten carbide/ceramic replaceable mechanical shaft seal. The material combination provides optimum sealing, resistance and long life. Together with the shaft seal housing, the sand shield forms a labyrinth seal, which during normal operating conditions prevents penetration of sand particles into the shaft seal.

The motor is fitted with the Grundfos Tempcon temperature sensor device that includes a NTC-resistor which senses the temperature. The resistor is built-in close to the winding. The temperature is converted into a high-frequency signal which is sent via the submersible drop cable and which can be converted into a temperature reading by means of Grundfos MP204.

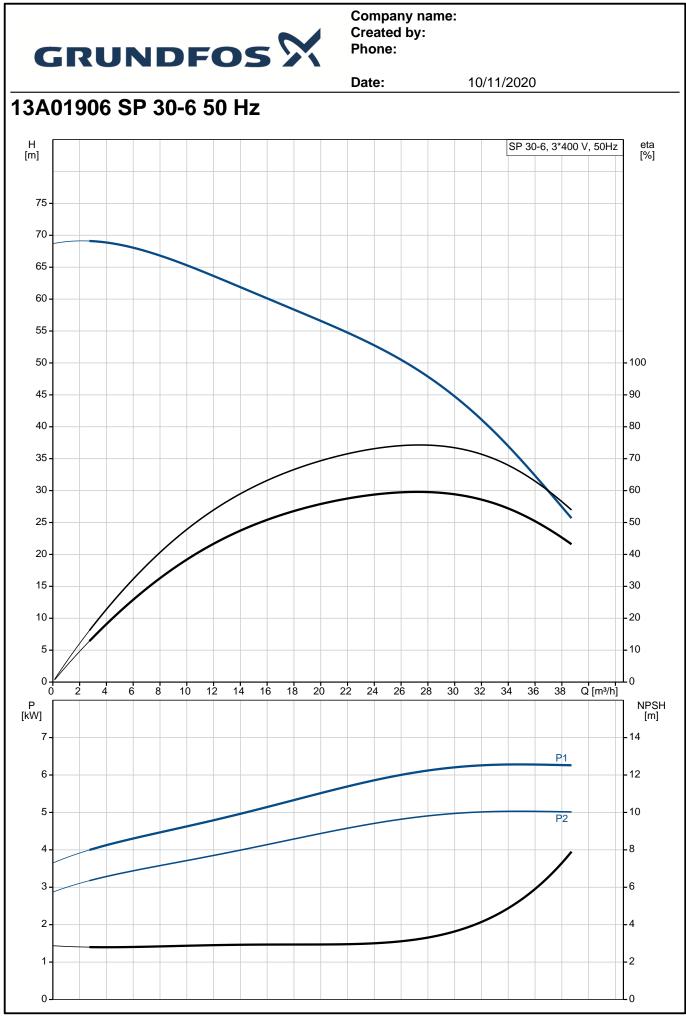

The MP204 is an electronic motor protection device that also monitors the supply network quality to protect the submersible motor against supply network disturbances.

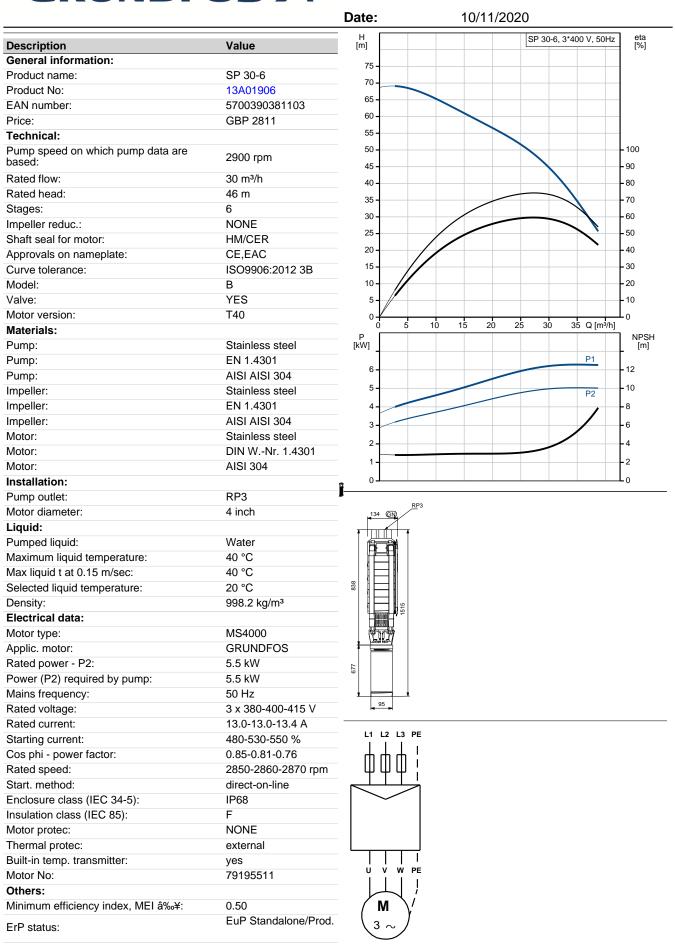

Technical: Pump speed on which pump data are based: 2900 rpm Rated flow: 30 m³/h Rated head: 46 m Shaft seal for motor: HM/CER Approvals on nameplate: CE,EAC Curve tolerance: ISO9906:2012 3B Motor version: T40 Materials: Pump: Stainless steel EN 1.4301 AISI AISI 304 Impeller: Stainless steel EN 1.4301 AISI AISI 304 Motor: Stainless steel DIN WNr. 1.4301 AISI 304	Liquid: Pumped liquid: Maximum liquid temperature: Max liquid t at 0.15 m/sec: Selected liquid temperature: Density:	Water 40 °C 40 °C 20 °C 998.2 kg/m³

Description				
Installation:				
Pump outlet:	RP3			
Motor diameter:	4 inch			
Electrical data:				
Motor type:	MS4000			
Rated power - P2:	5.5 kW			
Power (P2) required by pump:	5.5 kW			
Mains frequency:	50 Hz			
Rated voltage:	3 x 380-400-415 V			
Rated current:	13.0-13.0-13.4 A			
Starting current:	480-530-550 %			
Cos phi - power factor:	0.85-0.81-0.76			
Rated speed:	2850-2860-2870 rpm	1		
Start. method:	direct-on-line			
Enclosure class (IEC 34-5):	IP68			
Insulation class (IEC 85):	F			
Built-in temp. transmitter:	yes			
Motor No:	79195511			
Others:				
Minimum efficiency index, MEI á				
ErP status:	EuP Standalone/Proc	J.		
Net weight:	42.8 kg			
Gross weight:	68 kg
