ty.	Description						
	The pump is built with octagonal bearings with sand flush channels that minimise wear. As wear of the pump is inevitable, the pump design allows for easy replacement of all internal wear parts (bearings, impeller, wear rings and seal rings) to maintain high performance and a long lifetime.						
	The suction interconnector is fitted with a strainer to prevent large particles from entering the pump. The suction interconnector is designed to comply with NEMA standards for motor mounting/dimensions.						
	Motor						
	The winding wire is made from pure electrolytic cobber insulated by extruded two layers of PE/PA with high dielectric strength properties allowing direct contact between the motor fluid and winding wire. This ensures the best possible cooling of the winding wire. The PA layer ensures high mechanical wear properties of the winding wire.						
	The shaft seal faces are SiC/SiC. The material combination gives good performance when abrasive particles (sand) is present. Together with the shaft seal housing, the sand shield forms a labyrinth seal, which during norn operating conditions prevents penetration of sand particles into the shaft seal. This shaft seal is drinking water approved.						
	The motor can be fitted with a Pt100 or Pt1000 sensor that together with a control unit ensures that the maximum operating temperature conditions are not exceeded.						
	Liquid:						
	Pumped liquid:	Water					
	Maximum liquid temperature:	45 °C					
	Max liquid t at 0.15 m/sec:	40 °C					
	Max liquid t at 0.5 m/sec:	45 °C					
	Selected liquid temperature:	20 °C					
	Density:	998.2 kg/m ³					
	Technical:						
	Pump speed on which pump data are based: 2900 rpm						
	Rated flow:	215 m ³ /h					
	Rated head:	48 m					
	Shaft seal for motor:	SIC/SIC					
	Curve tolerance:	ISO9906:2012 3B					
	Motor version:	T45					
	Materials:						
	Pump:	Stainless steel					
		EN 1.4301					
		AISI AISI 304					
	Impeller:	Stainless steel					
		EN 1.4301					
		AISI AISI 304					
	Motor:	Cast iron					
		DIN WNr. 0.6025					
		ASTM 35-40					
	Installation:						
	Pump outlet:	RP6					
	Motor diameter:	8 inch					
	Electrical data:						
	Motor type:	MMS8000					
	Rated power - P2:	45 kW					
	Power (P2) required by pump:	45 kW					
	Mains frequency:	50 Hz					
	Rated voltage:	3 x 380-400-415 V					
	Rated current:	95.5-96.5-96.0 A					
	Starting current:	560-600-680 %					
	Cos phi - power factor:	0.88-0.82-0.80					
	Rated speed:	2900-2910-2920 rpm					
	Start. method:	direct-on-line
