Max. permitted total water hardness	3.57 mmol/l (20°dH) (3.21 mmol/l (18°dH) for 20/4 + 25/6)		

Materials

Pump housing	Cast iron	Pipe connection on the suction	DN 80
Impeller	PPE-GF30	side DNs	
Shaft	Stainless steel	Pipe connection on the pressure	DN 80
Bearing	Carbon, synthetic resin-	side DNd	
-	impregnated	Port-to-port length L0	360 mm

Tender text: TOP-Z 80/10 (3~400 V, PN 10, GG)

This circulator is suitable only for drinking water.

Can be used for domestic hot water circulation systems in the industry and building services.

Maintenance-free glandless circulator with threaded or flange connection, pre-selectable speed stages for power adjustment.

Equipment and function

- → Manual power adjustment with 3 speed stages
- → Pumps with 1~ motor:
 → P2 up to 90 W: internal protection against unacceptably high winding temperatures
 → P2 up to 90 W: internal protection with thermal winding contacts in conjunction with → P2 ≥ 180 W: Full motor protection with thermal winding contacts in conjunction with tripping unit (optional: SK 602N/SK 622N) Pumps with 3~ motor:
 - P2 up to 90 W: internal protection against unacceptably high winding temperatures
- → P2 ≥ 180 W: Internal protection against unacceptably night winding temperatures
 → P2 ≥ 180 W: Full motor protection with thermal winding contacts in conjunction with tripping unit (optional: SK 602N/SK 622N)
 → Mains connection 3-, 230 V with optional switching plug
 → Pump housing in red brass or grey cast iron (stainless steel depending on type)
 → PN 6/PN 10 combination flange (for DN 40 to DN 65)
 → Thermal isothelia a balls
- Thermal insulation shells

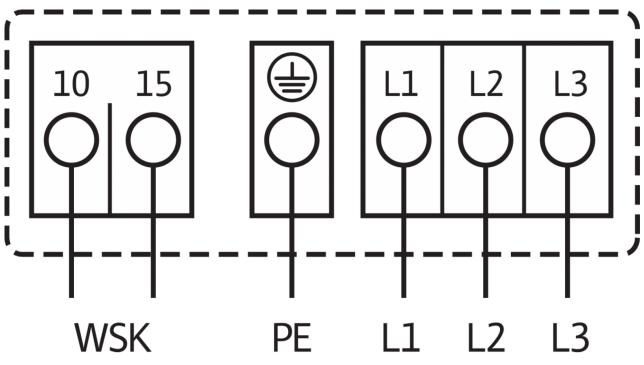

Operating data		Motor data	
Fluid media	Water	Emitted interference	EN 61000-6-3
Fluid temperature T	-20 °C	Interference resistance	EN 61000-6-2
Ambient temperature T	0 °C	Mains connection	3~400 V, 50 Hz
Maximum operating pressure PN	10 bar	Power consumption $P_{1 max}$	1440.0 W
Max. permitted total water	3.57 mmol/l (20°dH) (3.21 mmol/l	Max. speed n _{max}	2800 1/min
hardness	(18°dH) for 20/4 + 25/6)	Rated current I _N	2.92 A
		Protection class motor	IPX4D

Wiring diagram: TOP-Z 80/10 (3~400 V, PN 10, GG)

Mains connection, 3~400 V, 50 Hz

3~230 V, 50 Hz (optional with switching plug 3~230 V)

WSK = thermal winding contact

Full motor protection at all speed stages with optional tripping unit

SK 602N/SK 622N or other switchgear/control devices with WSK connection option

Triggering: External tripping at switchgear/control device

Reset: Automatic fault acknowledgement after cooling off of the motor

Automatic
