

SURFACE PUMPS

MULTISTAGE CENTRIFUGAL PUMPS IN AISI 316 STAINLESS STEEL

The DHI series horizontal multistage centrifugal pumps offer the following benefits:

- High hydraulic pressure and flow rate performance
- Minimum electrical energy consumption
- Extremely silent operation

Design Features

- Pump casing in AISI 316 stainless steel
- Aluminium motor coupling bracket
- Seal holder plate in AISI 316 stainless steel
- Impellers and diffusers in AISI 316 stainless steel
- Shaft in AISI 316 stainless steel
- EPDM rubber O ring
- Mechanical seal with graphite/ceramic counterfaces

Motor

- Enclosed, externally ventilated
- Level of protection IP 44
- Class F insulation
- Single phase power supply with capacitor permanently activated and thermal protection built into the motor winding
- Three phase power supply with external protection provided by the user
- Speed of rotation 2850 rpm
- Suitable for continuous use

Usage Limitations

- Types of pumped liquid: clear, non-explosive with no suspended solids or abrasive material
- Special liquids such as: softened demineralised water, washing system solutions, oils, non-aggressive chemical compound fluids
- Maximum liquid temperature 90°C
- Maximum recommended suction height 6 m with foot valve (with max. liquid temp. at 50°C)
- Maximum operating pressure 6 bar

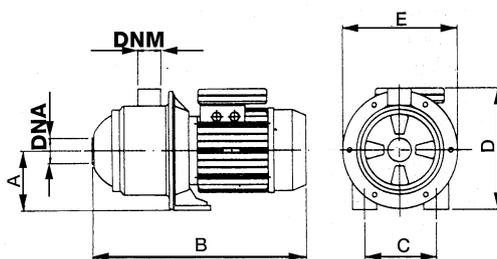

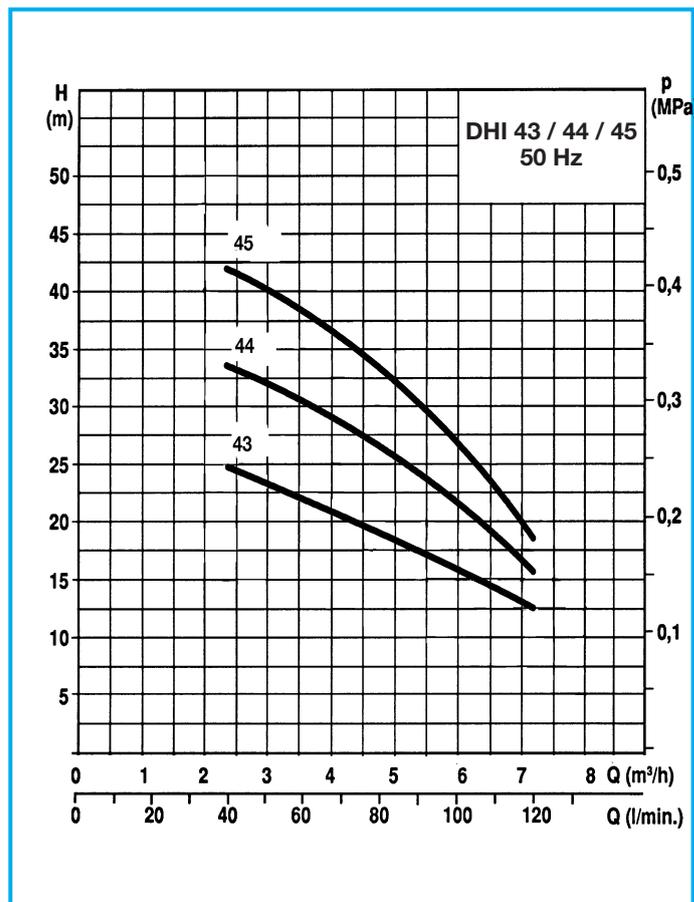

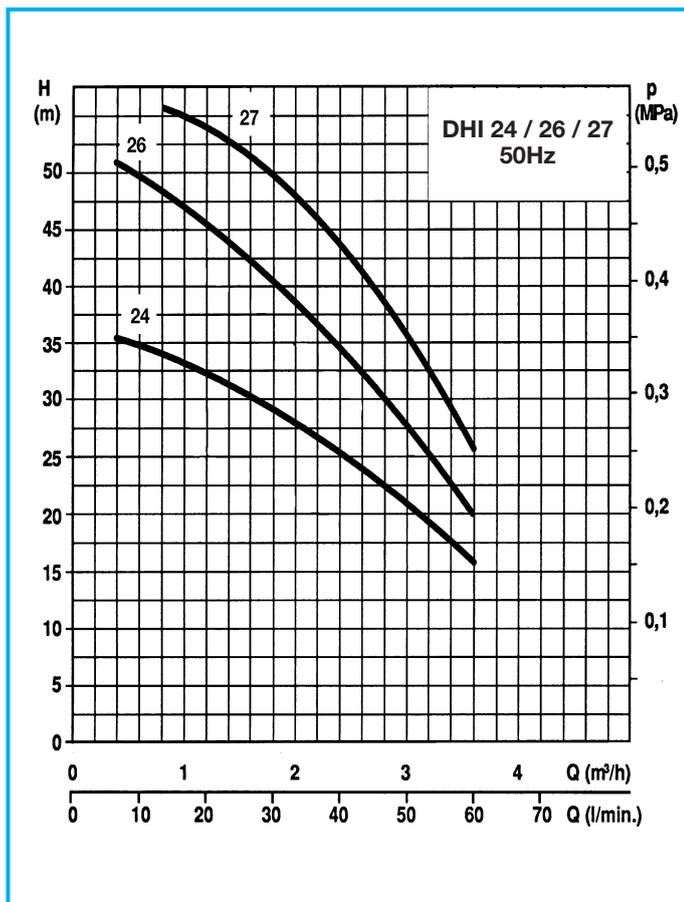

Applications

- Pumping and distribution of water in domestic systems used on a continuous or intermittent basis
- Booster systems
- Washing systems, garden irrigation, fountains
- Condensate conveyance
- Food and wine industries
- As a component of industrial machinery
