	Description		
	CRE 64-3-2 A-F-A-E-HQQE		
	Product No.: 96123996 Note! Proc	duct picture may differ from a	actual product
	Vertical, multistage centrifugal pump with inle are in cast iron – all other wetted parts are in handling, and easy access and service. Powe flanges.	stainless steel. A cartric	ge shaft seal ensures high reliability, safe
	The pump is fitted with a 3-phase, fan-cooled The motor includes a frequency converter and variable control of the motor speed, which ag	d PI controller in the mo	tor terminal box. This enables continuously of the performance to a given requirement.
	An operating panel on the motor terminal box or "Max." operation or to "Stop". The operatin	enables setting of requ g panel has indicator lig	ired setpoint as well as setting of pump to "M hts for "Operation" and "Fault".
	Communication with the pump is possible by enables further settings as well as reading ou input" and total "Power consumption".	means of Grundfos GO t of a number of parame	Remote (accessory). The remote control eters such as "Actual value", "Speed", "Powe
	The terminal box holds terminals for these co pump start/stop input (potential-free co remote setpoint setting via analog sigr 10 V voltage supply for setpoint potent three analog sensor inputs, 0-10 V, 0(24 V voltage supply for sensor, Imax = one analog output three digital inputs two Pt100 inputs two potential-free fault signal relays wi RS-485 GENIbus connection	ontact) nal, 0-10 V, 0(4)-20 mA tiometer, Imax = 5 mA 4)-20 mA = 40 mA	reporting "Fault", "Operation" or "Ready"
	interface for Grundfos CIM fieldbus mo	odule.	
	Further product details An external sensor can be connected if contro temperature is required.	olled pump operation ba	sed on for example flow, differential pressure
	An operating panel on the motor terminal box or "Max." operation or to "Stop". The operatin Communication with the pump is possible by	g panel has indicator lig	hts for "Operation" and "Fault".
	enables further settings as well as reading ou input" and total "Power consumption".	t of a number of parame	eters such as "Actual value", "Speed", "Powe
	Steel, cast iron and aluminium components h (CED) process.		
	CED is a high-quality dip-painting process wh particles as a thin, well-controlled layer on the	e surface.	ound the products ensures deposition of pair
	An integral part of the process is a pretreatme The entire process consists of these elements		

- 2) Zinc phosphating.
- 3) Cathodic electro-deposition.
- 4) Curing to a dry film thickness 18-22 my m.
- The colour code for the finished product is NCS 9000/RAL 9005.

Qty. | Description

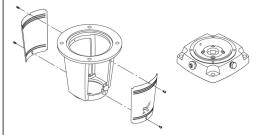

Pump

A long split coupling connects the pump and motor shaft. It is enclosed in the motor stool by means of two coupling guards. The long coupling makes it possible to replace the shaft seal without removing the motor from the pump.

Date:

The motor stool connects the pump head and motor. The pump head has a combined 1/2" priming plug and vent screw.

The pump is fitted with a balanced O-ring seal unit with a rigid torque-transmission system.

This seal type is assembled in a cartridge unit which makes replacement safe and easy.

Due to the balancing, this seal type is suitable for high-pressure applications.

The cartridge construction also protects the pump shaft from possible wear from a dynamic O-ring between pump shaft and shaft seal.

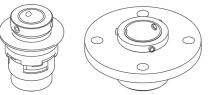

Primary seal:

- Rotating seal ring material: silicon carbide (SiC)
- Stationary seat material: silicon carbide (SiC)

This material pairing is used where higher corrosion resistance is required. The high hardness of this material pairing offers good resistance against abrasive particles.

Secondary seal material: EPDM (ethylene-propylene rubber)

EPDM has excellent resistance to hot water. EPDM is not suitable for mineral oils.

The shaft seal is retained in the pump head by a cover and screws. It can be replaced without removing the motor.

The chambers and impellers are made of stainless-steel sheet. The chambers are provided with a PTFE neck ring offering improved sealing and high efficiency. The impellers have smooth surfaces, and the shape of the blades ensure a high efficiency.

The base is made of cast iron. Both the inlet and the outlet side of the base have two pressure gauge tappings. The pump is secured to the foundation by four bolts through the base plate. The flanges are fastened to the base by means of locking rings.

Date:

Motor

The motor is a totally enclosed, fan-cooled motor with principal dimensions to IEC and DIN standards. The motor is flange-mounted with free-hole flange (FF).

Motor-mounting designation in accordance with IEC 60034-7: IM B 5 (Code I) / IM 3001 (Code II). Electrical tolerances comply with IEC 60034.

The motor efficiency is classified as IE3 in accordance with IEC 60034-30-1.

The motor requires no external motor protection. The motor control unit incorporates protection against slow- and quick-rising temperatures, e.g. constant overload and stalled conditions.

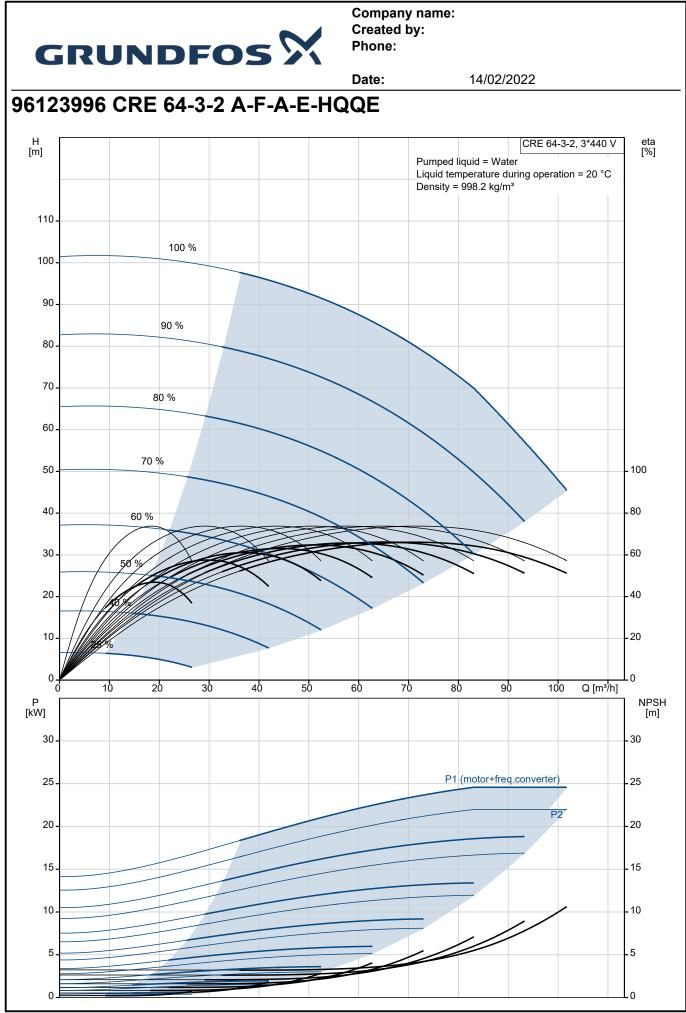

- The terminal box holds terminals for these connections:
 - pump start/stop input (potential-free contact)
 - remote setpoint setting via analog signal, 0-10 V, 0(4)-20 mA
 - 10 V voltage supply for setpoint potentiometer, Imax = 5 mA
 - three analog sensor inputs, 0-10 V, 0(4)-20 mA
 - 24 V voltage supply for sensor, Imax = 40 mA
 - one analog output
 - · three digital inputs
 - two Pt100 inputs
 - two potential-free fault signal relays with changeover contact, reporting "Fault", "Operation" or "Ready"
 - RS-485 GENIbus connection
 - interface for Grundfos CIM fieldbus module.
