Note! Product picture may differ from actual product

Product No.: 96528336

Grundfos GT-H-12 PN10 G 3/4 V is a Diaphragm pressure tank, with a capacity of 12.0 l and Vertical installation. The tanks are approved for drinking water. The GT-H-12 PN10 G 3/4 V is designed for a maximum operation pressure of 10 bar and a maximum liquid temperature of 90 °C.

The tank is a steel pressure tank with a non-toxic butyl rubber diaphragm with a precision-moulded polypropylene liner for superior air and water separation.

A pressure tank ensures controlled pressure in the water supply and thereby limits the switching frequency of the pump in case of low water consumption or leakage loss. The result is increased comfort in your installation by limiting the start/stop frequency of your pump, and it increases system comfort by compensating for pressure drops when a tap is opened, while reducing problems with water hammer in the pipework.

Liquid:
Maximum liquid temperature: 90 °C

Technical:
Membrane type: Diaphragm

Materials:
Material: Carbon steel / Polypropylene

Installation:
Maximum operating pressure: 10 bar
Size: 12.0

Others:
Net weight: 2.7 kg
Gross weight: 3.2 kg
Applicat. typ: Standard
Danish VVS No.:   398254812
