	1	MAGNA3 65-60 F						
		Product No.: 97924295						
		MAGNA3 – More than a pump With its unrivalled efficiency, all-encompassing range and built-in communication capa functionalities replacing system components, the MAGNA3 is ideal for engineers and s to create high-performance systems for buildings.						
		This pump in the Grundfos Master Class will fit both heating and cooling applications perfectly, making it the obvious choice for almost any building project – old or new.						
		The MAGNA3 is of the canned-rotor type, i.e. pump and motor form an integral unit without sha and with only two gaskets for sealing. The bearings are lubricated by the pumped liquid. The innovative clamp with only one screw enables easy repositioning of the pump head.						
		The MAGNA3 is a pump with no maintenance requirements and with extremely low Life Cycle Cost.						
		The pump is characterised by the following • controller integrated in the control box • control panel with TFT display on the cor	-

	Motor and electronic controller						
		The MAGNA3 incorporates a 4-pole synchronous, permanent-magnet motor (PM motor). This may type is characterised by higher efficiency than a conventional asynchronous squirrel-cage motor					
	The pump speed is controlled by an integrated frequency converter.						
		A differential-pressure and temperature sensor is incorporated in the pump.
