		Product No.: 97924494								
		MAGNA3 – More than a pump								
		With its unrivalled efficiency, all-encompassing range and built-in communication capabilities plus functionalities replacing system components, the MAGNA3 is ideal for engineers and specifiers looking to create high-performance systems for buildings.								
		This pump in the Grundfos Master Class will fit both heating and cooling applications perfectly, making								
		it the obvious choice for almost any building project – old or new.								
		The MAGNA3 is of the canned-rotor type, i.e. pump and motor form an integral unit without shaft seal and with only two gaskets for sealing. The bearings are lubricated by the pumped liquid.								
		The innovative clamp with only one screw e	nables easy reposition	oning of the pump head.						
		The MAGNA3 is a pump with no maintenan	ce requirements and	with extremely low Life Cycle Cost.						
		The pump is characterised by the following:								
		 controller integrated in the control box control panel with TFT display on the cont 	rol box							
		control box prepared for optional CIM mod								
		 built-in differential-pressure and temperatule cast-iron pump housing (depending on motion) 								
		carbon-fibre-reinforced composite rotor ca								
		 stainless-steel bearing plate and rotor clac aluminium alloy stator housing 	laing							
		air-cooled power electronics								
		The MAGNA3 is a single-phase pump.								
		Characteristic features • AUTOADAPT.								
		• FLOWADAPT and FLOWLIMIT (more tha	n a pump function as	it reduces the need for pump throttling						
		valves).Proportional-pressure control.								
		 Constant-pressure control. 								
		 Constant-temperature control. Constant-curve duty. 								
		• Max. or min. curve duty.								
		Automatic Night Setback.No external motor protection required.								
		• Insulating shells supplied with single-head								
		• Large temperature range where the liquid of each other.	temperature and the	ambient temperature are independent						
		Communication	he felles in m							
		The MAGNA3 enables communication via t • wireless Grundfos GO Remote	ne tollowing:							
		• fieldbus communication via CIM modules								
		digital inputsrelay outputs								
		 analog input (more than a pump function a 	as heat energy meter)

sition	Qty.	Description						
		Motor and electronic controller						
		The MAGNA3 incorporates a 4-pole synchronous, permanent-magnet motor (PM motor). This mot type is characterised by higher efficiency than a conventional asynchronous squirrel-cage motor.						
		The pump speed is controlled by an integrated frequency converter.						
		A differential-pressure and temperature sensor is incorporated in the pump.						
		Liquid:						
		Pumped liquid:	Water					
		Liquid temperature range:	-10 110 °C					
		Liquid temp:	60 °C					
		Density:	983.2 kg/m ³					
			Ũ					
		Technical:						
		TF class:	110					
		Approvals on nameplate:	CE,VDE,EAC					
		Materials:	Contiron					
		Pump housing:	Cast iron EN-GJL-250					
			ASTM A48-250B					
		Impeller:	PES 30%GF					
		Installation:						
		Range of ambient temperature:	0 40 °C					
		Maximum operating pressure:	10 bar					
		Flange standard:	DIN					
		Pipe connection:	DN 65					
		Pressure stage:	PN6/10					
		Port-to-port length:	340 mm					
		Electrical data:						
		Power input - P1:	29 1301 W					
		Mains frequency:	50 Hz					
		Rated voltage:	1 x 230 V					
		Maximum current consumption:						
		Enclosure class (IEC 34-5):	X4D					
		Insulation class (IEC 85):	F					
		Others:						
		Label:	Grundfos Blueflux					
		Energy (EEI):	0.17 45.8 kg					
		Net weight: Gross weight:	45.8 kg 53.4 kg					
		Shipping volume:	53.4 kg 137 m ³					
			1 57 m²
