	and due to its compliance with th	erfect choice when replacing older circulators savings on electricity is a reality. The ideal em control and monitoring is desired.				
 Monitoring via the fault relay, ensuring peace of mind Digital start/stop input available for remote pump control Continuous operation and reduced downtime with the wireless twin pump function (availab pumps) High energy efficiency resulting in substantial savings on electricity Easy setup and operation via the simple user interface No maintenance due to the canned-rotor type design. MAGNA1 is the simple and efficient choice for most applications including Heating Main pump Mixing loops Heating surfaces Cooling Air conditioning surfaces Ground source heat pump systems Smaller chiller applications
