#### Warning

Prior to installation, read these installation and operating instructions. Installation and operation must comply with local regulations and accepted codes of good practice.

#### Warning

The use of this product requires experience with and knowledge of the product.

Persons with reduced physical, sensory or mental capabilities must not use this product, unless they are under supervision or have been instructed in the use of the product by a person responsible for their safety.

Children must not use or play with this product.

## 1. Symbols used in this document

#### Warning

If these safety instructions are not observed, it may result in personal injury.

#### Warning

If these instructions are not observed, it may lead to electric shock with consequent risk of serious personal injury or death.

#### Warning

These instructions must be observed for explosion-proof pumps.

#### Caution

If these safety instructions are not observed, it may result in malfunction or damage to the equipment.

#### Note

Notes or instructions that make the job easier and ensure safe operation.

## 2. General description

This booklet includes instructions for installation, operation and maintenance of Grundfos SL1 and SLV submersible sewage and wastewater pumps with motors of 1.1 to 11 kW. Grundfos SL1 and SLV sewage and wastewater pumps are designed for pumping domestic, municipal and industrial sewage and wastewater.

Two types of pumps are available:

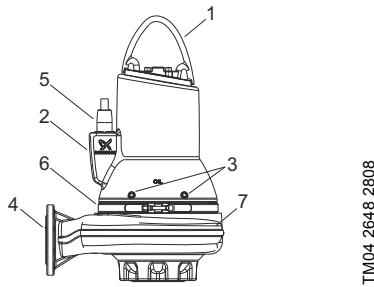

- SL1 sewage pumps with S-tube impeller
- SLV sewage pumps with SuperVortex free-flow impeller.

The pumps can be installed on an auto-coupling system or stand freely on the bottom of a tank.

Grundfos SL1 and SLV pumps are designed with an S-tube and SuperVortex impeller, respectively, to ensure reliable and optimum operation.

The booklet also includes specific instructions for the explosion-proof pumps.

### 2.1 Product drawing

**Fig. 1** SL1 pump

#### Pos. Description

|   |                 |
|---|-----------------|
| 1 | Lifting bracket |
| 2 | Nameplate       |
| 3 | Oil screws      |
| 4 | Outlet flange   |
| 5 | Cable plug      |
| 6 | Clamp           |
| 7 | Pump housing    |

## 2.2 Control and monitoring

The pumps can be controlled via the Grundfos controllers LC, LCD and dedicated controls DC, DCD. See section [8.2 Pump controllers](#).

Pumps with sensor are supplied together with an IO 113. See section [8.6 IO 113](#).

## 2.3 Applications

SL1 and SLV pumps are designed for pumping these liquids:

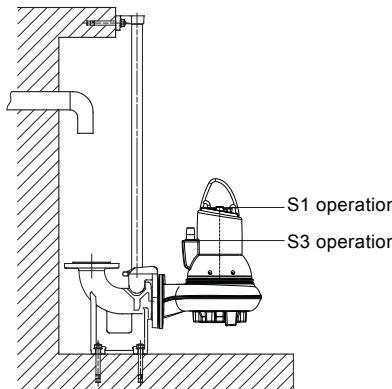

- large quantities of drainage and surface water
- domestic wastewater with discharge from toilets
- wastewater with a high content of fibres (SuperVortex impeller)
- municipal and commercial sewage and wastewater.

## 2.4 Operating conditions

SL1 and SLV pumps are suitable for the following operating situations:

- **S1 operation** (continuous operation), the pump must always be covered by the pumped liquid to the top of the motor. See fig. [2](#).
- **S3 operation** (intermittent operation), the pump must always be covered by the pumped liquid up to the top of the cable entry. See fig. [2](#).

For further information about S1 and S3 operation, see section [9.2 Operating modes](#).

**Fig. 2** Stop levels

**pH value**

SL1 and SLV pumps in permanent installations can be used for pumping liquids with the following pH values:

| Pump type | Material variant | Material  | pH value               |
|-----------|------------------|---|------------------------|
| SL1/SLV   | Standard         | Cast-iron impeller and pump housing                 | 6.5 - 14 <sup>1)</sup> |
| SLV       | Q                | Stainless-steel impeller and cast-iron pump housing | 6-14 <sup>1)</sup>     |

<sup>1)</sup> For fluctuating pH values, the range is pH 4 to 14.

**Liquid temperature**

0-40 °C.

For short periods (maximum 3 minutes) a temperature of up to 60 °C is permissible (non-Ex versions only).

## Warning

Explosion-proof pumps must never pump liquids of a temperature higher than +40 °C.

**Ambient temperature**

## Warning

For explosion-proof pumps, the ambient temperature on the installation site must be in the range from -20 °C to +40 °C.

For explosion-proof pumps with WIO sensor, the ambient temperature on the installation site must be in the range from 0-40 °C.

For non-explosion-proof pumps, the ambient temperature may exceed +40 °C for a short period (maximum 3 minutes).

**Density and viscosity of pumped liquid**

When pumping liquids with a density and/or a kinematic viscosity higher than that of water, use motors with correspondingly higher outputs.

**Flow velocity**

We recommend that you keep a minimum flow velocity to avoid sedimentations in the piping system. Recommended flow velocities:

- in vertical pipes: 1.0 m/s
- in horizontal pipes: 0.7 m/s.

**Free spherical passage**

From 50 to 100 mm, depending on pump size.

**Operating mode**

Maximum 20 starts per hour.

**3. Delivery and handling**

The pump may be transported and stored in a vertical or horizontal position. Make sure that it cannot roll or fall over.

**3.1 Transportation**

All lifting equipment must be rated for the purpose and checked for damage before any attempts to lift the pump. The lifting equipment rating must under no circumstances be exceeded. The pump weight is stated on the pump nameplate.

## Warning

Always lift the pump by its lifting bracket or by means of a fork-lift truck if the pump is fixed on a pallet. Never lift the pump by means of the power cable or the hose or the pipe.

**3.2 Storage**

During long periods of storage, the pump must be protected against moisture and heat.

Storage temperature: -30 °C to +60 °C.

## Warning

If the pump is stored for more than one year or it takes a long time before it is put into operation after the installation, the impeller must be turned at least once a month.

If the pump has been in use, the oil must be changed before storage.

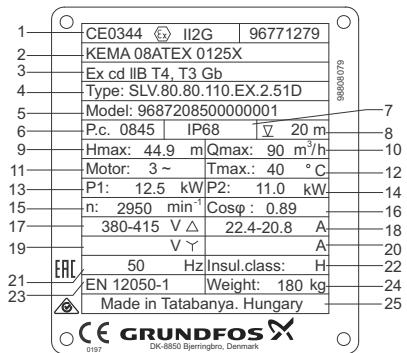

After a long period of storage, the pump must be inspected before it is put into operation. Make sure that the impeller can rotate freely. Pay special attention to the condition of the shaft seal, O-rings, oil and the cable entry.

## 4. Identification

### 4.1 Nameplate

The nameplate states the operating data and approvals applying to the pump. The nameplate is fitted to the side of the motor housing close to the cable entry.

Fix the extra nameplate supplied with the pump to the cable end in the control cabinet.

**Fig. 3** Nameplate

| Pos. | Description                          |
|------|--------------------------------------|
| 1    | Approvals                            |
| 2    | Explosion protection certificate No. |

## 4.2 Type key

The pump can be identified by means of the type designation stated on the pump nameplate.  
Example: **SLV.80.80.40.A.Ex.4.5.0D.Q**

| Code  | Designation                 | Explanation  |
|-------|-----------------------------|--|
| SL    | Pump type                   | Grundfos wastewater pump   |
| 1     | Impeller type               | S-tube impeller  |
| V     |                             | SuperVortex impeller   |
| 80    | Free spherical passage [mm] | Maximum solids size  |
| 80    | Pump outlet [mm]            | Nominal diameter of pump outlet                                    |
| 40    | Power [kW]                  | Output power P2 / 10   |
| Blank | Sensor version              | Standard version   |
| A     |                             | Sensor version   |
| Blank | Pump version                | Non-explosion-proof version  |
| Ex    |                             | Explosion-proof version  |
| 2     | Number of poles             | 2-pole   |
| 4     |                             | 4-pole   |
| 50    | Frequency [Hz]              | 50 Hz  |
| 0B    |                             | 3 x 400-415 V, direct-on-line starting                             |
| 0D    |                             | 3 x 380-415 V, direct-on-line starting                             |
| 1D    | Voltage and starting method | 3 x 380-415 V, star-delta starting                                 |
| 0E    |                             | 3 x 220-240 V, direct-on-line starting                             |
| 1E    |                             | 3 x 220-240 V, star-delta starting                                 |
| Blank |                             | 1st generation   |
| A     | Generation                  | 2nd generation   |
| B     |                             | 3rd generation   |
| C     |                             | 4rd generation   |
| Blank | Pump materials              | Cast-iron impeller, pump housing and motor housing                 |
| Q     |                             | Stainless-steel impeller, cast-iron pump housing and motor housing |
| Blank | Customisation               | Pump in standard range   |
| Z     |                             | Custom-built pump  |

## 5. Approvals

SL1 and SLV pumps have been tested by KEMA. The explosion-proof version hold two examination certificates:

- ATEX(EU): KEMA08ATEX0125X
- IECEx: IECEx KEM08.0039X

Both certificates have been issued by KEMA.

### 5.1 Approval standards

The standard variants are approved by LGA (notified body under the Construction Products Directive) according to EN 12050-1 or EN 12050-2 as specified on the pump nameplate.

## 5.2 Explanation to Ex approval

SL1 and SLV pumps have the following explosion protection classifications:

ATEX:

|  |                                     |
|--|-------------------------------------|
| Direct-drive pump without sensor:                  | CE 0344  II 2 G Ex c d IIB T4 Gb    |
| Direct-drive pump with sensor:                     | CE 0344  II 2 G Ex c d mb IIB T4 Gb |
| Pump driven by frequency converter without sensor: | CE 0344  II 2 G Ex c d IIB T3 Gb    |
| Pump driven by frequency converter with sensor:    | CE 0344  II 2 G Ex c d mb IIB T3 Gb |

IECEx:

|                      |                   |
|----------------------|-------------------|
| Pump without sensor: | Ex d IIB T3/T4 Gb |
| Pump with sensor:    | Ex d mb T3/T4 Gb  |

### 5.2.1 Europe

| Directive/standard                      | Code    | Description  |
|---|---------|--|
| ATEX                                    | CE 0344 | CE marking of conformity according to the ATEX directive 2014/34/EU.<br>0344 is the number of the notified body which has certified the quality system for ATEX. |
|   |         | = Marking of explosion protection.   |
|   | II      | = Equipment group according to the ATEX directive, defining the requirements applicable to the equipment in this group.  |
|   | 2       | = Equipment category according to the ATEX directive, defining the requirements applicable to the equipment in this category.                                    |
|   | G       | = Explosive atmosphere caused by gases or vapours.   |
|   | Ex      | = The equipment conforms to harmonised European standard.  |
|   | c       | = Constructional safety according to EN 13463-5:2011 and EN 13463-1:2009.  |
|   | d       | = Flameproof enclosure according to EN 60079-1:2007.   |
|   | mb      | = Encapsulation according to EN 60079-18:2009.   |
|   | IIB     | = Classification of gases, see EN 60079-0:2012. Gas group B includes gas group A.  |
| Harmonised European standard EN 60079-0 | T4/T3   | = Maximum surface temperature is 135 °C / 200 °C according to EN 60079-0:2012.   |
|   | Gb      | = Equipment protection level.  |

### 5.2.2 Australia and New Zealand

Explosion-proof variants for Australia and New Zealand are approved Ex d IIB T3/T4 Gb (without WIO sensor) or Ex d mb T3/T4 Gb (with WIO sensor).

| Standard                    | Code  | Description  |
|-----------------------------|-------|--|
| IEC 60079-0 and IEC 60079-1 | Ex    | = Area classification according to AS 2430.1.                                      |
|                             | d     | = Flameproof enclosure according to IEC 60079-1:2007.                              |
|                             | mb    | = Encapsulation according to IEC 60079-18:2009.                                    |
|                             | IIB   | = Classification of gases, see IEC 60079-0:2011. Gas group B includes gas group A. |
|                             | T4/T3 | = Maximum surface temperature is 135 °C / 200 °C according to IEC 60079-0:2011.    |
|                             | Gb    | = Equipment protection level.  |

## 6. Safety

### Warning

Pump installation in tanks must be carried out by specially trained persons.  
Work in or near tanks must be carried out according to local regulations.

### Warning

Persons must not enter the installation area when the atmosphere is explosive.

### Warning

It must be possible to lock the main switch in position 0. Type and requirements as specified in EN 60204-1, 5.3.2.

For safety reasons, all work in tanks must be supervised by a person outside the pump tank.

We recommend that you make all maintenance and service work when the pump is placed outside the tank.

**Note**

Tanks for submersible sewage and wastewater pumps may contain sewage or wastewater with toxic and/or disease-causing substances. Therefore, all persons involved must wear appropriate personal protective equipment and clothing, and all work on and near the pump must be carried out under strict observance of the hygiene regulations in force.

### Warning

Make sure that the lifting bracket is tightened before attempting to lift the pump. Tighten if necessary. Carelessness during lifting or transportation may cause injury to personnel or damage to the pump.

### 6.1 Potentially explosive environments

Use explosion-proof pumps for applications in potentially explosive environments. See section [5.2 Explanation to Ex approval](#).

### Warning

SL1 and SLV pumps must under no circumstances be used to pump explosive, flammable or combustible liquids.

### Warning

The classification of the installation site must be approved by the local fire-fighting authorities in each individual case.

Special conditions for safe use of SL1 and SLV explosion-proof pumps:

1. Make sure the moisture switch and thermal switches are connected in the same circuit but have separate alarm outputs (motor stop) in case of high humidity or high temperature in the motor.
2. Bolts used for replacement must be class A2-70 or better according to EN/ ISO 3506-1.
3. Contact the manufacturer for information on the dimensions of the flameproof joints.
4. The level of pumped liquid must be controlled by two level switches connected to the motor control circuit. The minimum level depends on the installation type and is specified in these installation and operating instructions.
5. Make sure the permanently attached cable is suitably mechanically protected and terminated in a suitable terminal board placed outside the potentially explosive area.
6. The sewage pumps have an ambient temperature range of -20 °C to +40 °C and a maximum process temperature of +40 °C. The minimum ambient temperature for a pump with a water-in-oil sensor is 0 °C.
7. The thermal protection in the stator windings has a nominal switch temperature of 150 °C and must guarantee the disconnection of the power supply. The power supply must be reset manually.
8. The control unit must protect the WIO sensor against short circuit current of the supply to which it is connected. The maximum current from the control unit must be limited to 350 mA.
9. In case of frequency converter usage, the maximum surface temperature of the pump can be 200 °C.

## 7. Installation

### Warning

During installation, always support the pump by means of lifting chains or place it in horizontal position to secure stability.

**Caution** Prior to installation, make sure the tank bottom is even.

### Warning

Before beginning the installation, switch off the power supply and lock the main switch in position 0 with a padlock to ensure that the power supply cannot be accidentally switched on.

Any external voltage connected to the pump must be switched off before working on the pump.

Before beginning installation procedures, carry out these checks:

- Does the pump correspond to order?
- Is the pump suitable for the supply voltage and frequency available at the installation site?
- Are accessories and other equipment undamaged?

**Note** Further details concerning accessories can be found in the data booklet on SL1 and SLV pumps on [www.grundfos.com](http://www.grundfos.com).

Fix the extra nameplate supplied with the pump to the cable end in the control cabinet.

All safety regulations must be observed at the installation site, for example the use of blowers for fresh-air supply to the tank.

Prior to installation, check the oil level in the oil chamber. See section **10. Maintenance and service**.

### Warning

Do not put your hands or any tool into the pump inlet or outlet port after the pump has been connected to the power supply, unless the pump has been switched off by removing the fuses or switching off the main switch. Make sure that the power supply cannot be accidentally switched on.

**Caution** We recommend that you always use Grundfos accessories to avoid malfunctions due to incorrect installation.

### Warning

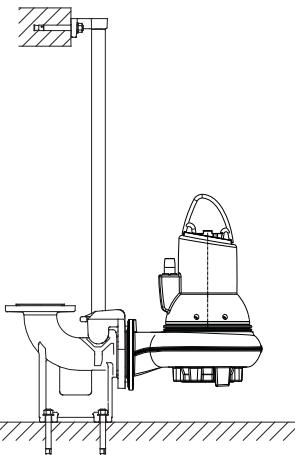

Only use the lifting bracket for lifting the pump. Do not use it to hold the pump when in operation.

### Installation types

SL1 and SLV pumps are designed for two installation types:

- submerged installation on auto coupling
- free-standing submerged installation on ring stand.

## 7.1 Submerged installation on auto coupling

TM04 2650 2808

**Fig. 4** Submerged installation on auto coupling

Pumps for permanent installation can be installed on a stationary auto-coupling guide rail system. The auto-coupling system facilitates maintenance and service as the pump can easily be lifted out of the tank.

### Warning

Before beginning installation procedures, make sure that the atmosphere in the tank is not potentially explosive.

**Caution** Make sure that the pipes are installed without the use of undue force. No loads from the weight of the pipes must be carried by the pump. We recommend that you use loose flanges to ease the installation and to avoid pipe tension at flanges and bolts.

**Caution** Do not use elastic elements or bellows in the pipes. These elements must never be used as a means to align the pipes.

Proceed as follows:

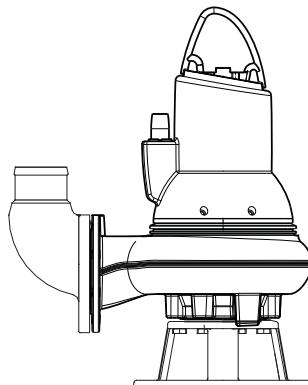

1. Drill mounting holes for the guide rail bracket on the inside of the tank and fasten the guide rail bracket provisionally with two screws.
2. Place the auto-coupling base unit on the bottom of the tank. Use a plumb line to establish the correct positioning. Fasten the auto coupling with expansion bolts. If the bottom of the tank is uneven, the auto-coupling base unit must be supported so that it is level when being fastened.
3. Assemble the outlet pipe in accordance with the generally accepted procedures and without exposing the pipe to distortion or tension.
4. Place the guide rails on the auto-coupling base unit and adjust the length of the rails accurately to the guide rail bracket at the top of the tank.
5. Unscrew the provisionally fastened guide rail bracket. Insert the upper guide rail bracket into the guide rails. Fasten the guide rail bracket on the inside of the tank.

**Note** The guide rails must not have any axial play as this would cause noise during pump operation.

6. Clean out debris from the tank before lowering the pump into the tank.
7. Fit the guide claw to the outlet port of the pump.
8. Slide the guide claw of the pump between the guide rails and lower the pump into the tank by means of a chain secured to the lifting bracket of the pump. When the pump reaches the auto-coupling base unit, the pump will automatically connect tightly.
9. Hang up the end of the chain on a suitable hook at the top of the tank and in such a way that the chain cannot come into contact with the pump housing.
10. Adjust the length of the power cable by coiling it up on a relief fitting to ensure that the cable is not damaged during operation. Fasten the relief fitting to a suitable hook at the top of the tank. Make sure that the cables are not sharply bent or pinched.
11. Connect the power cable.

**Note** The free end of the cable must not be submerged, as water may penetrate into the cable.

## 7.2 Free-standing submerged installation on ring stand

TM04 265-1 2808

**Fig. 5** Free-standing submerged installation on ring stand

Pumps for free-standing submerged installation cannot stand freely on the bottom of the tank. The pump must be installed on a ring stand. See fig. 5.

The ring stand is available as an accessory.

In order to facilitate service on the pump, fit a flexible union or coupling to the elbow on the outlet port for easy separation.

If a **hose** is used, make sure that the hose does not buckle and that the inside diameter of the hose matches that of the pump outlet port.

If a **rigid pipe** is used, fit the union or coupling, non-return valve and isolating valve in the order mentioned, when viewed from the pump.

If the pump is installed in muddy conditions or on uneven ground, support the pump on bricks or a similar support.

Proceed as follows:

- Fit a 90 ° elbow to the pump outlet port and connect the outlet pipe or hose.
- Lower the pump into the liquid by means of a chain secured to the lifting bracket of the pump. We recommend that you place the pump on a plane, solid foundation. Make sure that the pump is hanging from the chain and **not** the cable. Make sure that the pump is standing securely.
- Hang up the end of the chain on a suitable hook at the top of the tank and in such a way that the chain cannot come into contact with the pump housing.
- Adjust the length of the power cable by coiling it up on a relief fitting to ensure that the cable is not damaged during operation. Fasten the relief fitting to a suitable hook at the top of the tank. Make sure that the cable is not sharply bent or pinched.
- Connect the power cable.

**Note** The free end of the cable must not be submerged, as water may penetrate into the cable.

### 7.3 Torques for inlet and outlet flanges

#### Grade 4.6 (5) galvanised steel screws and nuts

| DN     | DC<br>[mm] | Screws  | Specified torques rounded off by ± 5 [Nm] |                 |
|--------|------------|---------|---|-----------------|
|        |            |         | Slightly oiled                            | Well lubricated |
| DN 65  | 145        | 4 x M16 | 70  | 60              |
| DN 80  | 160        | 8 x M16 | 70  | 60              |
| DN 100 | 180        | 8 x M16 | 70  | 60              |
| DN 150 | 240        | 8 x M20 | 140                                       | 120             |

#### Grade A2.50 (AISI 304) steel screws and nuts

| DN     | DC<br>[mm] | Screws  | Specified torques rounded off by ± 5 [Nm] |                 |
|--------|------------|---------|---|-----------------|
|        |            |         | Slightly oiled                            | Well lubricated |
| DN 65  | 145        | 4 x M16 | -   | 60              |
| DN 80  | 160        | 8 x M16 | -   | 60              |
| DN 100 | 180        | 8 x M16 | -   | 60              |
| DN 150 | 240        | 8 x M20 | -   | 120             |

The gasket must be a full face, reinforced

**Caution** paper gasket like Klingsersil C4300. If softer gasket material is used, torques must be reconsidered.

## 8. Electrical connection

### Warning

The pump must not run dry.

An additional level switch must be installed to ensure that the pump is stopped in case the stop level switch is not operating.

### Warning

Connect the pump to an external main switch which ensures all-pole disconnection with a contact separation according to EN 60204-1, 5.3.2.

It must be possible to lock the main switch in position 0. Type and requirements as specified in EN 60204-1, 5.3.2.

The electrical connection must be carried out in accordance with local regulations.

### Warning

The pumps must be connected to a control box with a motor protection relay with IEC trip class 10 or 15.

### Warning

Power supply for motor protection circuit must be low voltage, Class 2.

See motor protection wiring diagram in section [8.1 Wiring diagrams](#).

### Warning

Pumps for hazardous locations must be connected to a control box with a motor protection relay with IEC trip class 10.

### Warning

Do not install Grundfos control boxes, pump controllers, Ex barriers and the free end of the power cable in potentially explosive environments.

The classification of the installation site must be approved by the local fire-fighting authorities in each individual case.

On explosion-proof pumps, make sure that an external earth conductor is connected to the external earth terminal on the pump using a secure cable clamp. Clean the surface of the external earth connection and mount the cable clamp.

The cross section of the earth conductor must be at least 4 mm<sup>2</sup>, for example type H07 V2-K (PVT 90 °) yellow and green.

Make sure that the earth connection is protected from corrosion.

Make sure that all protective equipment has been connected correctly.

Float switches used in potentially explosive environments must be approved for this application. They must be connected to the Grundfos LC, LCD 108 pump controller via the intrinsically safe LC-Ex4 barrier to ensure a safe circuit.

### Warning

If the supply cable is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons.

Set the motor-protective circuit breaker to the rated current of the pump. The rated current is stated on the pump nameplate.

#### Caution

If the pump has an Ex mark on the nameplate, make sure that the pump is connected in accordance with the instructions given in this booklet.

The mains supply voltage and frequency are marked on the pump nameplate. The voltage tolerance must be within -10 % to +10 % of the rated voltage. Make sure that the motor is suitable for the power supply available at the installation site.

All pumps are supplied with 10 m cable and a free cable end, except for pumps for Australia and New Zealand which have 15 m cable.

**Pumps without sensor** must be connected to one of these three controller types:

- a control box with motor-protective circuit breaker, such as a Grundfos CU 100
- a Grundfos LC, LCD 107, LC, LCD 108 or LC, LCD 110 pump controller
- a Grundfos DC, DCD pump controller.

**Pumps with sensor** must be connected to a Grundfos IO 113 and one of these three controller types:

- a control box with motor-protective circuit breaker, such as a Grundfos CU 100
- a Grundfos LC, LCD 107, LC, LCD 108 or LC, LCD 110 pump controller
- a Grundfos DC, DCD pump controller.

#### Warning

Before installation and the first startup of the pump, check the condition of the cable visually to avoid short circuits.

#### Pumps with WIO sensor

For safe installation and operation of pumps equipped with a WIO sensor, we recommend that you install an RC filter between the power contactor and the pump.

If an RC filter is installed to avoid any kind of transients in the installation, the RC filter must be installed between the power contactor and the pump.

Please note that the following aspects may cause problems in case of transients in the power supply system:

- Motor power:
  - The bigger the motor, the higher the transients.
- Length of power cable:
  - Where power and signal conductors are running in parallel close to each other, the risk of transients causing interference between power and signal conductors will increase with the length of the cable.
- Switchboard layout:
  - Power and signal conductors must be physically separated as much as possible. Close installation can cause interference in case of transients.
- Supply network "stiffness":
  - If a transformer station is located close to the installation, the supply network may be "stiff" and transient levels will be higher.

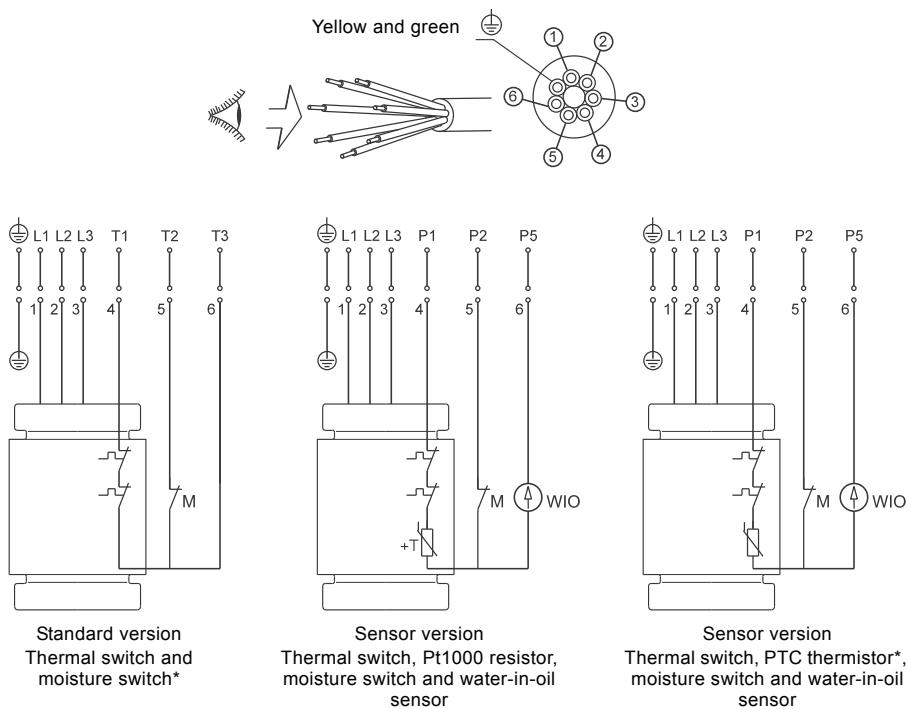

If combinations of the above aspects are present, it may be necessary to install RC filters for pumps with WIO sensors to protect against transients.

Transients can be completely eliminated if soft starters are used. But be aware that soft starters and variable speed drives have other EMC-related issues that must be taken into consideration.

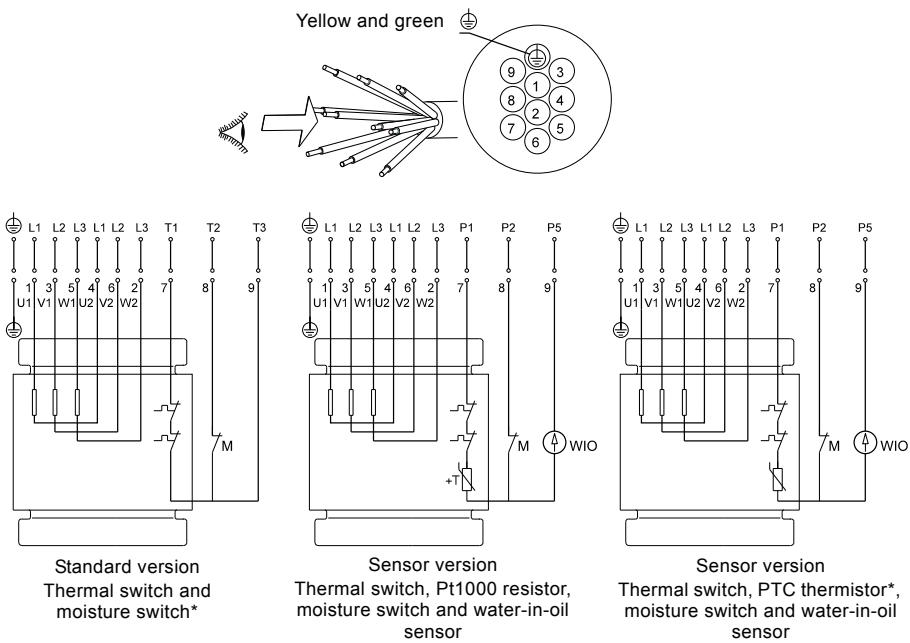

For more information, see section [8.7 Frequency converter operation](#)

## 8.1 Wiring diagrams

The pumps are supplied via either a 7-core cable or a 10-core cable. See fig. 6 for wiring diagrams for 7-core cable connection or figs. 7, 8 and 9 for wiring diagrams for 10-core cable connection. For further information, see the installation and operating instructions for the selected control box or pump controller.

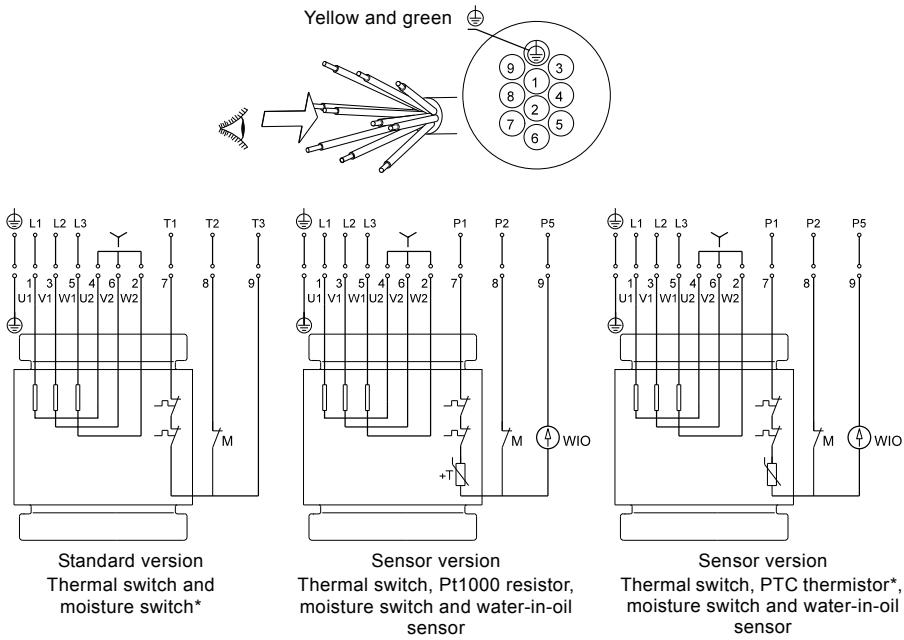

**Fig. 6** Wiring diagram, 7-core cable, DOL

\* Pumps from 4 kW and up sold in Australia and New Zealand are fitted with a PTC thermistor.

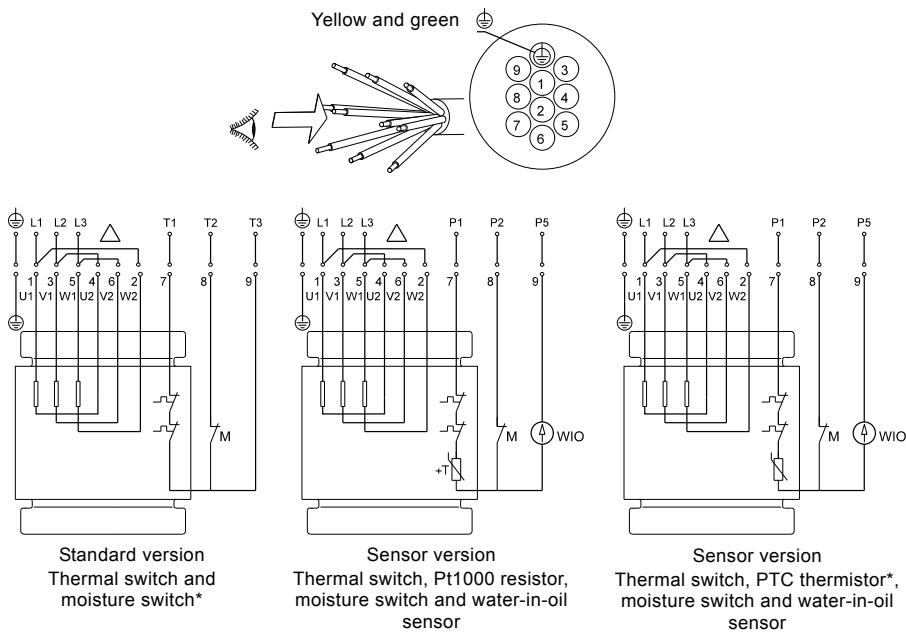

**Fig. 7** Wiring diagram, 10-core cable, star/delta (Y/D)

\* Pumps from 4 kW and up sold in Australia and New Zealand are fitted with a PTC thermistor.

**Fig. 8** Wiring diagram, 10-core cable, star-connected (Y)

TM04 6886 0314

**Fig. 9** Wiring diagram, 10-core cable, delta-connected (D)

To find out whether the pump is fitted with a thermal switch or a PTC thermistor, measure the motor winding resistance. See table below.

|                | Without cable | With 10 m cable | With 15 m cable |
|----------------|---------------|-----------------|-----------------|
| Thermal switch | < 50 mΩ       | < 320 mΩ        | < 390 mΩ        |
| PTC thermistor | > 100 mΩ      | > 370 mΩ        | > 440 mΩ        |

## 8.2 Pump controllers

SL1 and SLV pumps can be connected to the following Grundfos pump controllers for level control: LC controllers are for one-pump-installations and LCD controllers are for two-pump installations.

- LC 107 and LCD 107 with air bells
- LC 108 and LCD 108 with float switches
- LC 110 and LCD 110 with electrodes
- Grundfos DC and DCD.

For further information on controllers, please see the installation and operating instructions for the selected controller or go to [www.grundfos.com](http://www.grundfos.com).

## 8.3 Thermal switch, Pt1000 and PTC thermistor

All SL1 and SLV pumps have thermal protection incorporated in the stator windings.

### Pumps without sensor

Pumps without sensor have a thermal switch or a PTC thermistor. Via the pump controller safety circuit, the thermal switch will stop the pump by breaking the circuit in case of overtemperature (approximately 150 °C). The thermal switch will reclose the circuit after cooling. For pumps equipped with a PTC thermistor, connect the thermistor to either the PTC relay or the I/O module to break the circuit at 150 °C.

The maximum operating current of the thermal switch is 0.5 A at 500 VAC and cos φ 0.6. The switch must be able to break a coil in the supply circuit.

### Pumps with WIO sensor

Pumps with WIO sensor have either a thermal switch and a Pt1000 sensor or a PTC thermistor in the windings, depending on the installation site.

Via the pump controller safety circuit, the thermal switch or the thermistor will stop the pump by breaking the circuit in case of overtemperature (approximately 150 °C). The thermal switch or the thermistor will reclose the circuit after cooling.

The maximum operating current of both the Pt1000 and the thermistor is 1 mA at 24 VDC.

### Non-explosion-proof pumps

When closing the circuit after cooling, the thermal protection can restart the pump automatically via the controller. Pumps from 4 kW and up sold in Australia and New Zealand are fitted with a PTC thermistor.

## Explosion-proof pumps

### Warning

The thermal protection of explosion-proof pumps must not restart the pump automatically. This ensures protection against overtemperature in potentially explosive environments. In pumps with sensor this is done by removing the short circuit between terminals R1 and R2 in the IO 113. See Electrical data in the installation and operating instructions for IO 113.

### Warning

 The separate motor-protective circuit breaker or controller must not be installed in potentially explosive environments.

## 8.4 WIO sensor (water-in-oil sensor)

The WIO sensor measures the water content in the oil and converts the value into an analogue current signal. The two sensor conductors are for power supply and for carrying the signal to the IO 113. The sensor measures the water content from 0 to 20 %. It also sends a signal if the water content is outside the normal range (warning), or if there is air in the oil chamber (alarm). The sensor is fitted in a stainless-steel tube for mechanical protection.

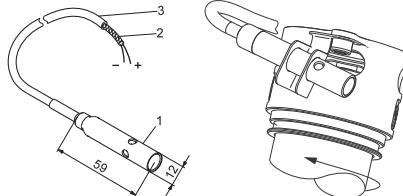

Fig. 10 WIO sensor

### 8.4.1 Fitting the WIO sensor

Fit the sensor next to one of the shaft seal openings. See fig. 10. The sensor must be tilted into the motor's direction of rotation to ensure that oil is led into the sensor. Make sure that the sensor is submerged in the oil.

### 8.4.2 Technical data

|                      |             |
|----------------------|-------------|
| Input voltage:       | 12-24 VDC   |
| Output current:      | 3.4 - 22 mA |
| Power input:         | 0.6 W       |
| Ambient temperature: | 0-70 °C     |

See also the installation and operating instructions for IO 113 on [www.grundfos.com](http://www.grundfos.com).

## 8.5 Moisture switch

All pumps are fitted with a moisture switch as standard with the moisture switch being connected via the supply cable, see section [8. Electrical connection](#), and connected to a separate circuit breaker.

The moisture switch is positioned in the bottom of the motor. If there is moisture in the motor, the switch will break the circuit and send a signal to the IO 113.

The moisture switch is non-reversing and must be replaced after use.

The moisture switch is connected to the control cable, and it must be connected to the safety circuit of the separate pump controller. See section [8. Electrical connection](#).

The motor-protective circuit breaker of the pump controller must include a circuit which automatically disconnects the power supply in case the protective circuit for the pump is opened.

## 8.6 IO 113

IO 113 provides an interface between a Grundfos wastewater pump equipped with sensors and the pump controller(s). The most important sensor status information is indicated on the front panel.

One pump can be connected to one IO 113 module.

Together with the sensors, the IO 113 provides a galvanic isolation between the motor voltage in the pump and the connected controller(s).

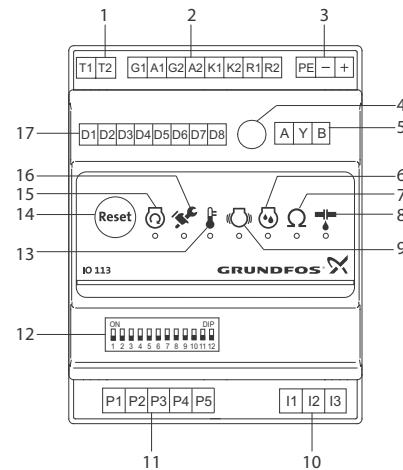

IO 113 can do the following as standard:

- Protect the pump against overheating.
- Monitor the status of these items:
  - motor winding temperature
  - leakage (WIO)
  - moisture in pump.
- Measure the stator insulation resistance.
- Stop the pump in case of alarm.
- Remotely monitor the pump via RS-485 communication (Modbus or GENibus).
- Control the pump via a frequency converter.

### Warning

IO 113 must not be used for purposes other than those specified above.

TM05 1881 3811

Fig. 11 IO 113 module

### Pos. Description

|    |   |
|----|---|
| 1  | Terminals for alarm relay   |
| 2  | Terminals for analog and digital inputs and outputs                         |
| 3  | Terminals for supply voltage  |
| 4  | Potentiometer for setting the warning limit of stator insulation resistance |
| 5  | Terminals for RS-485 for GENibus or Modbus                                  |
| 6  | Indicator light for moisture measurement                                    |
| 7  | Indicator light for stator insulation resistance                            |
| 8  | Indicator light for leakage (WIO)   |
| 9  | Indicator light for vibration in pump                                       |
| 10 | Terminals for measurement of stator insulation resistance                   |
| 11 | Terminals for connection of pump sensors                                    |
| 12 | DIP switch for configuration  |
| 13 | Indicator light for motor temperature                                       |
| 14 | Button for resetting alarms   |
| 15 | Indicator light for motor running   |
| 16 | Indicator light for service   |
| 17 | Terminals for digital outputs   |

## 8.7 Frequency converter operation

All SL1 and SLV pump types are designed for frequency converter operation to keep the energy consumption at a minimum.

To avoid the risk of sedimentation in the pipes, we recommend that you operate the speed-controlled pump at a flow rate above 1 m/s.

For frequency converter operation, please observe the following:

- Requirements must be fulfilled. See section [8.7.1 Requirements](#).
- Recommendations ought to be followed. See section [8.7.2 Recommendations](#).
- Consequences ought be considered. See section [8.7.3 Consequences](#).

### 8.7.1 Requirements

- The thermal protection of the motor must be connected.
- Minimum switching frequency: 2.5 kHz.
- Peak voltage and  $dU/dt$  must be in accordance with the table below. The values stated are maximum values supplied to the motor terminals. The cable influence has not been taken into account. See the frequency converter data sheet regarding the actual values and the cable influence on the peak voltage and  $dU/dt$ .

| Maximum repetitive peak voltage<br>[V] | Maximum $dU/dt$<br>$U_N$ 400 V<br>[V/ $\mu$ sec.] |
|--|---|
| 850                                    | 2000  |

- If the pump is an Ex-approved pump, check if the Ex certificate of the specific pump allows the use of a frequency converter.
- Set the frequency converter U/f ratio according to the motor data.
- Local regulations and standards must be fulfilled.

### 8.7.2 Recommendations

Before installing a frequency converter, calculate the lowest allowable frequency in the installation in order to avoid zero flow.

- Do not reduce the motor speed to less than 30 % of rated speed.
- Keep the flow velocity above 1 m/sec.
- Let the pump run at rated speed at least once a day in order to prevent sedimentation in the piping system.
- Do not exceed the frequency indicated on the nameplate. In this case there is risk of motor overload.
- Keep the power cable as short as possible. The peak voltage will increase with the length of the power cable. See data sheet for the frequency converter used.
- Use input and output filters on the frequency converter. See data sheet for the frequency converter used.
- Use screened power cable if there is a risk that electrical noise can disturb other electrical equipment. See data sheet for the frequency converter used.

### 8.7.3 Consequences

When operating the pump via a frequency converter, please be aware of these possible consequences:

- The locked-rotor torque will be lower. How much lower will depend on the frequency converter type. See the installation and operating instructions for the frequency converter used for information on the locked-rotor torque available.
- The working condition of bearings and shaft seal may be affected. The possible effect will depend on the application. The actual effect cannot be predicted.
- The acoustic noise level may increase. See the installation and operating instructions for the frequency converter used for advice as to how to reduce the acoustic noise.

## 9. Startup

### Warning

Before starting work on the pump, make sure that the fuses have been removed or the main switch has been switched off. Make sure that the power supply cannot be accidentally switched on.

Make sure that all protective equipment has been connected correctly.

The pump must not run dry.

### Warning

The pump must not be started if the atmosphere in the tank is potentially explosive.

### Warning

It may lead to personal injuries or death to open the clamp while the pump is operating.

### 9.1 General startup procedure

This procedure applies to new installations as well as after service inspections if startup takes place some time after the pump was placed in the tank.

1. Remove the fuses and check that the impeller can rotate freely. Turn the impeller by hand.

### Warning

The impeller can have sharp edges - wear protective gloves.

2. Check the condition of the oil in the oil chamber. See also section [10.1 Inspection](#).
3. Check that the system, bolts, gaskets, pipes and valves are in correct condition.
4. Mount the pump in the system.
5. Switch on the power supply.
6. Check whether the monitoring units, if used, are operating satisfactorily.
7. **For pumps with WIO sensor**, switch on IO 113 and check that there are no alarms or warnings. See section [8.6 IO 113](#).
8. Check the setting of air bells, float switches or electrodes.
9. Check the direction of rotation. See section [9.3 Direction of rotation](#).
10. Open the isolating valves, if fitted.
11. Check that the liquid level is above the motor for S1 operation and above the cable entry for S3 operation. See fig. [14](#). If the minimum level is not reached do not start the pump.
12. Start the pump and let the pump run briefly, and check if the liquid level is falling.
13. Observe if the outlet pressure and input current are normal. If not there might be air trapped inside the pump.

Trapped air can be removed from the pump housing by tilting the pump by means of the lifting chain when the pump is in operation.

### Note

In case of abnormal noise or vibrations from the pump, other pump failure or power supply failure or water supply

### Caution

failure, stop the pump immediately. Do not attempt to restart the pump until the cause of the fault has been found and the fault corrected.

After one week of operation or after replacement of the shaft seal, check the condition of the oil in the chamber. For pumps without sensor, this is done by taking a sample of the oil. See section [10. Maintenance and service](#) for procedure.

Every time the pump has been removed from the tank, go through the above procedure when starting up again.

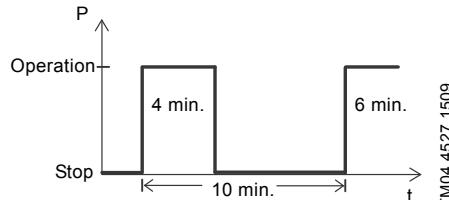

## 9.2 Operating modes

The pumps are designed for intermittent operation (S3). When completely submerged, the pumps can also operate continuously (S1).

### S3, intermittent operation:

Operating mode S3 means that within 10 minutes the pump must be in operation for 4 minutes and stopped for 6 minutes. See fig. [12](#).

In this operating mode, the pump is partly submerged in the pumped liquid, that is the liquid level reaches at minimum the top of the cable entry on the motor housing. See fig. [2](#).

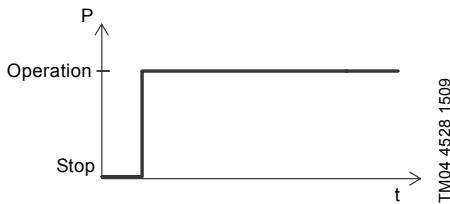

**Fig. 12** S3, intermittent operation

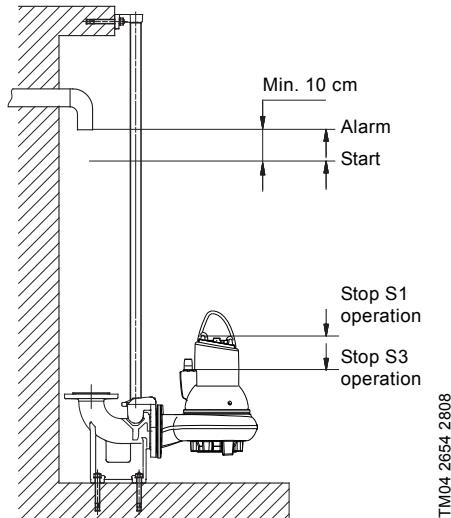

TM04 4527 1509

**S1, continuous operation:**

In this operating mode, the pump can operate continuously without being stopped for cooling. See fig. 13. Being completely submerged, the pump is sufficiently cooled by the surrounding liquid. See fig. 2.

**Fig. 13** S1, continuous operation

**Fig. 14** Start and stop levels

Make sure that the effective volume of the tank does not become so low that the number of starts per hour exceeds the maximum permissible number.

**9.3 Direction of rotation**

The pump may be started for a very short period without being submerged to check the direction of rotation.

Check the direction of rotation before starting up the pump.

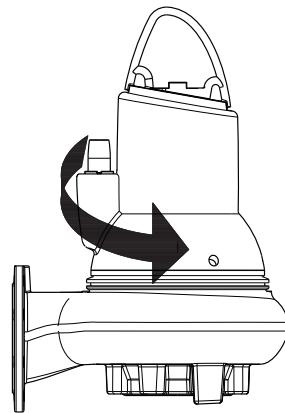

An arrow on the motor housing indicates the correct direction of rotation. Correct direction of rotation is clockwise when viewed from above.

**Checking the direction of rotation**

The direction of rotation must be checked in the following way every time the pump is connected to a new installation.

**Procedure**

1. Let the pump hang from a lifting device, for example the hoist used for lowering the pump into the tank.
2. Start and stop the pump while observing the movement (jerk) of the pump. If connected correctly, the impeller will rotate clockwise, that is the pump will jerk counterclockwise. See fig. 15.
3. If the direction of rotation is wrong, interchange any two of the phases in the power supply cable. See fig. 6 or 8.

**Fig. 15** Jerk direction

## 10. Maintenance and service

### Warning

During maintenance and service, including transportation to service workshop, always support the pump by means of lifting chains or place it in horizontal position to secure stability.

### Warning

Before starting work on the pump, make sure that the fuses have been removed or the main switch has been switched off. Make sure that the power supply cannot be accidentally switched on.

Make sure that all protective equipment has been connected correctly.

### Warning

Before starting work on the pump, make sure that the main switch has been locked in position 0.

All rotating parts must have stopped moving.

### Warning

Maintenance work on explosion-proof pumps must be carried out by Grundfos or a service workshop authorised by Grundfos.

However, this does not apply to the hydraulic components, such as pump housing and impeller.

### Warning

The cable must only be replaced by Grundfos or a service workshop authorised by Grundfos.

Before carrying out maintenance and service, make sure that the pump has been thoroughly flushed with clean water. Rinse the pump parts in water after dismantling.

### 10.1 Inspection

Pumps running normal operation must be inspected every 3000 operating hours or at least once a year. If the pumped liquid is very muddy or sandy, inspect the pump at shorter intervals.

Check the following points:

- **Power consumption**  
See pump nameplate.
- **Oil level and oil condition**  
When the pump is new or after replacement of the shaft seal, check the oil level and water content after one week of operation. If there is more than 20 % extra liquid (water) in the oil chamber, the shaft seal is defective. The oil must be changed after 3000 operating hours or once a year.

Use Shell Ondina 919 oil or similar type.

See section [10.2.1 Oil change](#).

- **Cable entry**

Make sure that the cable entry is watertight (visual inspection) and that the cable is not sharply bent and/or pinched.

- **Pump parts**

Check impeller, pump housing, etc. for possible wear. Replace the defective parts.

See section [10.2.2 Removing the pump housing and impeller](#).

- **Ball bearings**

Check the shaft for noisy or heavy operation (turn the shaft by hand). Replace the defective ball bearings.

A general overhaul of the pump is usually required in case of defective ball bearings or poor motor function. This work must be carried out by Grundfos or a service workshop authorised by Grundfos.

### Warning

Defective bearings may reduce the Ex safety.

- **O-rings and similar parts**

During service and replacement, make sure that the grooves for the O-rings as well as the seal faces have been cleaned before the new parts are fitted. Grease O-rings and recesses before assembly.

**Note**

Do not reuse rubber parts.

### Warning

Explosion-proof pumps must be checked by an authorised Ex workshop once a year.

## 10.2 Dismantling the pump

**Note** See [www.grundfos.com](http://www.grundfos.com) for service videos.

### 10.2.1 Oil change

After 3000 operating hours or once a year, change the oil in the oil chamber as described below.

If the shaft seal has been replaced, the oil must be changed.

#### Warning

When loosening the screws of the oil chamber, note that pressure may have built up in the chamber. Do not remove the screws until the pressure has been fully relieved.

#### Draining of oil

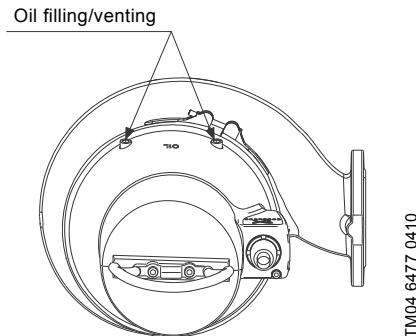

1. Place the pump on a plane surface with one oil screw pointing downwards.
2. Place a suitable container (approximately 1 litre), for instance made of transparent plastic material, under the oil screw.

**Note** Used oil must be disposed of in accordance with local regulations.

3. Remove the lower oil screw.
4. Remove the upper oil screw.  
If the pump has been in operation for a long period of time, if the oil is drained off shortly after the pump has been stopped, and if the oil is greyish white like milk, it contains water. If the oil contains more than 20 % water, it is an indication that the shaft seal is defective and must be replaced. If the shaft seal is not replaced, the motor will be damaged.
- If the quantity of oil is smaller than the quantity stated in section [10.4 Oil quantities](#), the shaft seal is defective.
5. Clean the faces for the gaskets for oil screws.

#### Filling with oil

1. Turn the pump so that the oil filling holes are placed opposite to each other, pointing upwards.

**Fig. 16** Oil filling holes

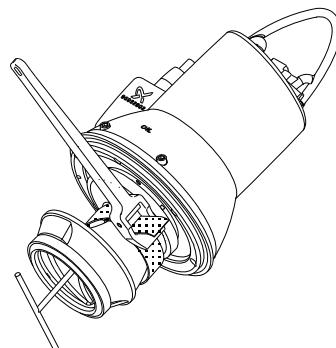

2. Pour oil into the chamber.  
For oil quantity, see section [10.4 Oil quantities](#).
3. Fit the oil screws with new gaskets.

### 10.2.2 Removing the pump housing and impeller

For position numbers, see pages [38](#) and [39](#).

#### Procedure

1. Loosen the clamp (92).
2. Remove the screw (92a) using your fingers.
3. Remove the pump housing (50) by inserting two screwdrivers between the cooling jacket and the pump housing.
4. Remove the screw (188a). Hold the impeller with a strap wrench.

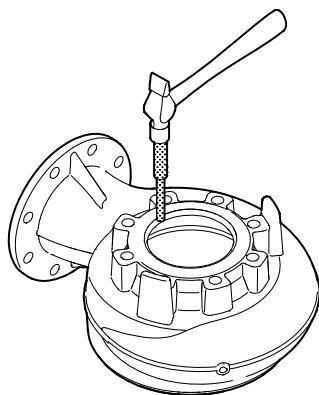

**Fig. 17** Removing the impeller

5. Loosen the impeller (49) with a light blow on the edge. Pull it off.
6. Remove the key (9a) and the spring for impeller (157).

### 10.2.3 Removing the seal ring and wear ring

#### Procedure

1. Turn the pump housing upside-down.
2. Knock the seal ring (46) out of the pump housing using a punch.

### 10.2.4 Removing the shaft seal

#### Procedure

1. Remove the screws (188).
2. Remove the cover for oil chamber (58) using a puller.
3. Remove the screws (186).
4. Remove the shaft seal (105) using the puller.
5. Remove the O-ring (153b).

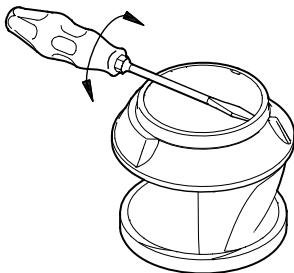

#### Procedure (pump with WIO sensor)

1. Remove the screws (188).
2. Remove the cover for oil chamber (58) using a puller.
3. Remove the screws (186).
4. Remove the sensor (521) and holder (522) from the shaft seal.
5. Remove the shaft seal (105) using the puller.
6. Remove the O-ring (153b).

TM02 8420 5103

**Fig. 18** Removing the seal ring

3. Clean the pump housing where the seal ring was fitted.
4. Remove the wear ring (49c) using a screwdriver.

TM02 8422 5103

**Fig. 19** Removing the wear ring

5. Clean the impeller where the wear ring was fitted.

## 10.3 Assembling the pump

### 10.3.1 Tightening torques and lubricants

| Pos.    | Designation | Quantity | Dim.          | Torque [Nm] | Lubricant |
|---------|-------------|----------|---------------|-------------|-----------|
| 92a     | Screw       | 1        |               | 12 ± 2      |           |
| 118a    | Screw       | 2        | M8            | 20 ± 2      |           |
|         |             |          | M10           | 30 ± 3      |           |
| 174     | Screw       | 1        |               | 4 ± 1       |           |
| 181     | Union nut   | 1        | 7-core cable  | 50 ± 5      |           |
|         |             |          | 10-core cable | 75 ± 5      |           |
| 186     | Screw       | 2        |               | 7 + 2-0     |           |
| 182     | Screw       | 4        |               | 20 ± 2      |           |
| 187     | Screw       | 4        |               | 20 ± 2      |           |
| 188     | Screw       | 2        | M8            | 20 ± 2      |           |
|         |             |          | M10           | 30 ± 3      |           |
| 188a    | Screw       | 2        | M10           | 50 + 5-0    |           |
|         |             |          | M12           | 75 ± 5      |           |
| 193     | Screw       | 2        |               | 16 ± 2      |           |
| O-rings | All         |          |               |             | Rocol     |

Rocol Sapphire Aqua-Sil, product number RM2924 (1 kg).

Shell Ondina 919, product number 96001442 (1 l).

### 10.3.2 Fitting the shaft seal

#### Procedure

1. Fit and lubricate the O-ring (153b) with oil.
2. Slide the shaft seal (105) gently over the shaft.
3. Fit and tighten the screws (186).
4. Fit and lubricate the O-ring (107) in the cover for oil chamber (58) with oil.
5. Fit the cover for oil chamber.
6. Fit and tighten the screws (188).

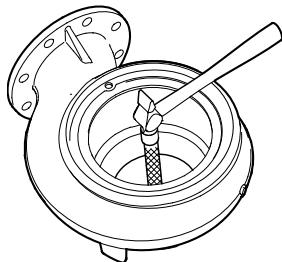

#### Procedure (pump with WIO sensor)

1. Fit and lubricate the O-ring (153b) with oil.
2. Slide the shaft seal (105) gently over the shaft.
3. Fit the holder (522) and sensor (521) with one of the screws (186).
4. Fit the second screw and tighten both screws (186).
5. Fit and lubricate the O-ring (107) in the cover for oil chamber (58) with oil.
6. Check that the sensor is positioned correctly. See section [8.4.1 Fitting the WIO sensor](#) and fig. 10. This is of special importance in horizontal pumps.
7. Fit the cover for oil chamber.
8. Fit and tighten the screws (188).

### 10.3.3 Fitting the seal ring and wear ring

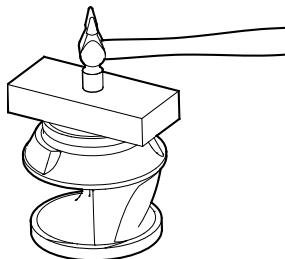

#### Procedure

1. Lubricate the seal ring (46) with soapy water.
2. Place the seal ring in the pump housing.
3. Knock the seal ring home in the pump housing using a punch or a wooden block.

**Fig. 20** Fitting the seal ring

4. Place the wear ring (49c) on the impeller.
5. Knock the wear ring home using a wooden block.

**Fig. 21** Fitting the wear ring

### 10.3.4 Fitting the impeller and pump housing

#### Procedure

1. Fit the spring (157) and the key (9a). Keep the key in position while the impeller is fitted.
2. Fit the impeller (49).
3. Fit the washer (66) and the screw (188a).
4. Tighten the screw (188a) to 75 Nm. Hold the impeller with the strap wrench.
5. Mark the position of the pin on the pump housing.
6. Mark the position of the pin hole on the oil chamber.
7. Fit and lubricate the O-ring (37) with oil.
8. Fit the pump part in the pump housing (50).
9. Fit the clamp (92).
10. Tighten the screw (92a) to 12 Nm.
11. Check that the impeller rotates freely and without drag.

### 10.4 Oil quantities

The table shows the quantity of oil in the oil chamber of SL1 and SLV pumps. Oil type: Shell Ondina 919.

|               | Power [kW] | Oil quantity [l] |
|---------------|------------|------------------|
| <b>2-pole</b> | 2.2        | 0.6              |
|               | 3.0        | 0.6              |
|               | 4.0        | 1.0              |
|               | 6.0        | 1.0              |
|               | 7.5        | 1.0              |
|               | 9.2        | 1.2              |
|               | 11.0       | 1.2              |
|               | 1.1        | 0.6              |
| <b>4-pole</b> | 1.3        | 0.6              |
|               | 1.5        | 0.6              |
|               | 2.2        | 0.6              |
|               | 3.0        | 1.0              |
|               | 4.0        | 1.0              |
|               | 5.5        | 1.0              |
|               | 7.5        | 1.2              |

**Note** Used oil must be disposed of in accordance with local regulations.

### 10.5 Service kits

For service kits for SL1 and SLV, see [www.grundfos.com](http://www.grundfos.com) or Service Kit Catalogue.

### 10.6 Contaminated pumps

**Note** The product will be classified as contaminated if it has been used for a liquid which is injurious to health or toxic.

If you request Grundfos to service the product, contact Grundfos with details about the liquid before returning the product for service. Otherwise, Grundfos can refuse to accept the product for service.

Any application for service must include details about the liquid.

Clean the product in the best possible way before you return it.

Costs of returning the product are to be paid by the customer.

## 11. Fault finding

### Warning

Before attempting to diagnose any fault, make sure that the fuses have been removed or the main switch has been switched off. Make sure that the power supply cannot be accidentally switched on.

All rotating parts must have stopped moving.

### Warning

All regulations applying to pumps installed in potentially explosive environments must be observed.

Make sure that no work is carried out in potentially explosive atmosphere.

For pumps with sensor, start fault finding by checking the status on the IO 113 front panel.

### Note

See installation and operating instructions for IO 113.

| Fault  | Cause   | Remedy  |
|--|---|---|
| 1. The motor does not start.<br>The fuses blow or the motor-protective circuit breaker trips immediately.<br><b>Caution:</b> Do not start again! | a) Supply failure; short circuit; earth-leakage fault in cable or motor winding.<br><br>b) The fuses blow due to use of the wrong type of fuse.<br><br>c) The impeller is blocked by impurities.<br><br>d) Air bells, float switches or electrodes are out of adjustment or defective.<br><br>e) Moisture in the stator housing (alarm).<br>IO 113 interrupts the supply voltage.*<br><br>f) The WIO sensor is not covered by oil (alarm). IO 113 interrupts the supply voltage.*<br><br>g) Stator insulation resistance is too low.* | Have the cable and motor checked and repaired by a qualified electrician.<br><br>Fit fuses of the correct type.<br><br>Clean the impeller.<br><br>Readjust or replace the air bells, float switches or electrodes.<br><br>Replace the O-rings, the shaft seal and moisture switch.<br><br>Check, and possibly replace, the shaft seal, fill up with oil and reset IO 113.<br><br>Reset the alarm on IO 113, see the installation and operating instructions for IO 113. |
| 2. The pump operates, but the motor-protective circuit breaker trips after a short while.  | a) Low setting of the thermal relay in the motor-protective circuit breaker.<br><br>b) Increased current consumption due to large voltage drop.<br><br>c) The impeller is blocked by impurities.<br>Increased current consumption in all three phases.<br><br>d) Wrong direction of rotation.   | Set the relay in accordance with the specifications on the nameplate.<br><br>Measure the voltage between two motor phases. Tolerance: -10 % to +6 %. Reestablish the correct voltage supply.<br><br>Clean the impeller.<br><br>Check the direction of rotation and possibly interchange any two of the phases in the incoming supply cable. See section <a href="#">9.3 Direction of rotation</a> .   |
| 3. The thermal switch of the pump trips after a short while.   | a) The liquid temperature is too high.<br><br>b) The viscosity of the pumped liquid is too high.<br><br>c) Wrong electrical connection. (If the pump is star-connected to a delta connection, the result will be very low undervoltage).  | Reduce the liquid temperature.<br><br>Dilute the pumped liquid.<br><br>Check and correct the electrical installation.   |

| Fault   | Cause  | Remedy  |
|---|--|---|
| 4. The pump operates at below-standard performance and power consumption. | a) The impeller is blocked by impurities.<br>b) Wrong direction of rotation.                         | Clean the impeller.<br><br>Check the direction of rotation and possibly interchange any two of the phases in the incoming supply cable. See section <a href="#">9.3 Direction of rotation</a> . |
| 5. The pump operates, but gives no liquid.                                | a) The outlet valve is closed or blocked.<br>b) Non-return valve blocked.<br>c) Air in pump.         | Check the outlet valve and possibly open and/or clean it.<br><br>Clean the non-return valve.<br><br>Vent the pump.  |
| 6. High power consumption (SLV).  | a) Wrong direction of rotation.<br>b) The impeller is blocked by impurities.                         | Check the direction of rotation and possibly interchange any two of the phases in the incoming supply cable. See section <a href="#">9.3 Direction of rotation</a> .<br><br>Clean the impeller. |
| 7. Noisy operation and excessive vibrations (SL1).                        | a) Wrong direction of rotation.<br>b) The impeller is blocked by impurities.                         | Check the direction of rotation and possibly interchange any two of the phases in the incoming supply cable. See section <a href="#">9.3 Direction of rotation</a> .<br><br>Clean the impeller. |
| 8. The pump is clogged.   | a) The liquid contains large particles.<br>b) A float layer has formed on the surface of the liquid. | Select a pump with a larger size of passage.<br><br>Install a mixer in the tank.  |

\* Applies only to pumps with sensor and with IO 113.

## 12. Technical data

### Supply voltage

- 3 x 380-415 V -10 % to +10 %, 50 Hz
- 3 x 400-415 V -10 % to +10 %, 50 Hz.

### Enclosure class

IP68. According to IEC 60529.

### Insulation class

H (180 °C).

### Pressure

Maximum pressure: 6 bar

All pump housings have a cast-iron PN 10 outlet flange.

### Dimensions

Outlet flanges are DN 65, DN 80, DN 100 or DN 150 according to EN 1092-2.

### Pump curves

Pump curves are available via the internet on [www.grundfos.com](http://www.grundfos.com).

The curves are to be considered as a guide. They must not be used as guarantee curves.

Test curves for the supplied pump are available on request.

Make sure that the pump does not operate outside the recommended operating range during normal operation.

### Pump noise emission < 70 dB(A)

- Sound power measurements were carried out according to ISO 3743.
- Sound power was calculated at a distance of 1 metre according to ISO 11203.

The sound pressure level of the pump is lower than the limiting values stated in the EC Council Directive 2006/42/EC relating to machinery.

| 2-pole motor                 |                              |                |                    |                       | Cable connection                             |                            |

The supply cable resistance depends on the cable diameter.

Resistance per running metre of cable: 1.5 mm<sup>2</sup> = 0.012 Ω.

Resistance per running metre of cable: 2.5 mm<sup>2</sup> = 0.007 Ω.

The supply cable resistance depends on the cable diameter.

Resistance per running metre of cable: 1.5 mm<sup>2</sup> = 0.012 Ω.

Resistance per running metre of cable: 2.5 mm<sup>2</sup> = 0.007 Ω.

### 13. Disposal

This product or parts of it must be disposed of in an environmentally sound way:

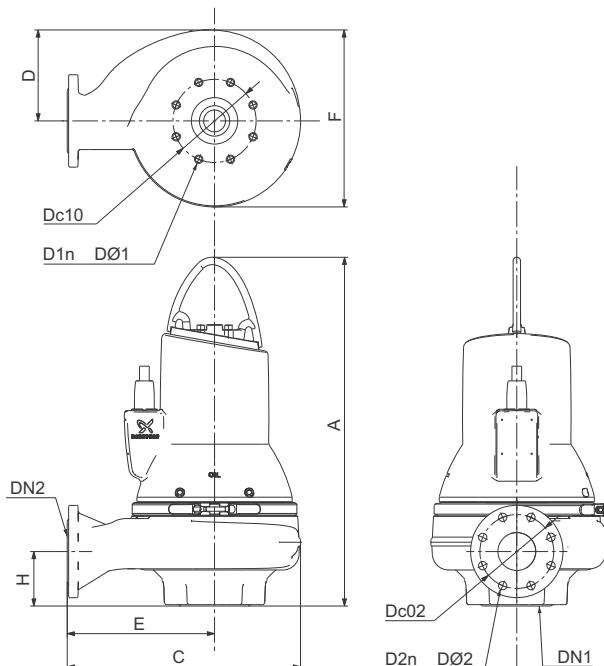

1. Use the public or private waste collection service.
2. If this is not possible, contact the nearest Grundfos company or service workshop.

Subject to alterations.

## Declaration of performance

**GB:**

### EU declaration of performance in accordance with Annex III of Regulation (EU) No 305/2011 (Construction Product Regulation)

1. Unique identification code of the product type:
  - EN 12050-1 or EN 12050-2 (SL1.50).
2. Type, batch or serial number or any other element allowing identification of the construction product as required pursuant to Article 11(4):
  - SL1, SLV pumps marked with EN 12050-1 or EN 12050-2 (SL1.50) on the nameplate.
3. Intended use or uses of the construction product, in accordance with the applicable harmonised technical specification, as foreseen by the manufacturer:
  - Pumps for pumping of wastewater containing faecal matter marked with EN 12050-1 on the nameplate.
  - SL1.50 pumps for pumping of faecal-free wastewater marked with EN 12050-2 on the nameplate.
4. Name, registered trade name or registered trade mark and contact address of the manufacturer as required pursuant to Article 11(5):
  - Grundfos Holding A/S  
Poul Due Jensens Vej 7  
8850 Bjerringbro  
Denmark.
5. NOT RELEVANT.
6. System or systems of assessment and verification of constancy of performance of the construction product as set out in Annex V: System 3.
7. In case of the declaration of performance concerning a construction product covered by a harmonised standard:
  - TÜV Rheinland LGA Products GmbH, identification number: 0197.  
Performed test according to EN 12050-1 or EN 12050-2 (SL1.50) under system 3.  
(description of the third party tasks as set out in Annex V)
    - Certificate number: LGA-Certificate № 7381115. Type-tested and monitored.
8. NOT RELEVANT.
9. Declared performance:  
The products covered by this declaration of performance are in compliance with the essential characteristics and the performance requirements as described in the following:
  - Standards used: EN 12050-1:2001 or EN 12050-2:2000 (SL1.50).
10. The performance of the product identified in points 1 and 2 is in conformity with the declared performance in point 9.

**BG:**

### Декларация на ЕС за изпълнение съгласно Анекс III на регламент (ЕС) № 305/2011 (Регламент за строителните продукти)

1. Уникален идентификационен код на типа продукт:
  - EN 12050-1 или EN 12050-2 (SL1.50).
2. Типов, партиден или сериен номер на всеки друг елемент, позволяващ идентификация на строителния продукт, изисквана съгласно Член 11(4):
  - Помни SL1, SLV, означени с EN 12050-1 или EN 12050-2 (SL1.50) на табелата с данни.
3. Употреба или употреби по предназначение на строителния продукт, в съответствие с приложимата хармонизирана техническа спецификация, както е предвидено от производителя:
  - Помни за изпомпване на отпадни води, съдържащи фекалини вещества, означени с EN 12050-1 на табелата с данни.
  - Помни SL1.50 за изпомпване на отпадни води без фекални вещества, означени с EN 12050-2 на табелата с данни.
4. Име, запазено търговско име или запазена търговска марка и адрес за контакт на производителя, както се изиска съгласно Член 11(5):
  - Grundfos Holding A/S  
Poul Due Jensens Vej 7  
8850 Bjerringbro  
Дания.
5. НЕ СЕ ОТНАСЯ ЗА СЛУЧАЙ.
6. Система или системи за оценка и проверка на устойчивостта на изпълнението на строителния продукт, както е изложено в Анекс V:
  - Система 3.
7. В случаи на декларация за изпълнение, отнасяща се за строителен продукт, който попада в обсега на хармонизиран стандарт:
  - TÜV Rheinland LGA Products GmbH, идентификационен номер: 0197.  
Изпълнен тест в съответствие с EN 12050-1 или EN 12050-2 (SL1.50) съгласно система 3.  
(описание на задачи на трети лица, както е изложено в Анекс V)
    - Номер на сертификат: LGA сертификат № 7381115.  
Тестван за тип и наблюдаван.
8. НЕ СЕ ОТНАСЯ ЗА СЛУЧАЙ.
9. Декларирано изпълнение:  
Продуктите, предмет на тази декларация за изпълнение, са в съответствие с основните характеристики и изисквания за изпълнение, описани по-долу:
  - Приложени стандарти: EN 12050-1:2001 или EN 12050-2:2000.
10. Изпълнението на продукта, посочен в точки 1 и 2, е в съответствие с декларираното изпълнение в точка 9.

**CZ:**

**Prohlášení o vlastnostech EU v souladu s Dodatkiem III předpisu (EU) č. 305/2011 (Předpis pro stavební výrobky)**

1. Jedinečný identifikační kód typu výrobku:
  - EN 12050-1 nebo EN 12050-2 (SL1.50).
2. Typ, dávka nebo výrobní číslo nebo jakýkoliv prvek umožňující identifikaci stavebního výrobku podle požadavku Článku 11(4):
  - Čerpadla SL1, SLV s označením EN 12050-1 nebo EN 12050-2 (SL1.50) na typovém štítku.
3. Zamýšlena použití stavebního výrobku v souladu s příslušnou harmonizovanou technickou specifikací výrobce:
  - Čerpací stanice odpadních vod s fekáliemi s označením EN 12050-1 na typovém štítku.
  - Čerpací stanice SL1.50 odpadních vod s fekáliemi s označením EN 12050-2 na typovém štítku.
4. Název, registrovaný obchodní název nebo registrovaná ochranná známka a kontaktní adresa výrobce podle požadavku Článku 11(5):
  - Grundfos Holding A/S  
Poul Due Jensens Vej 7  
8850 Bjerringbro  
Dánsko.
5. NESOUVISL.
6. Systém nebo systémy posuzování a ověřování stálosti vlastnosti stavebního výrobku podle ustanovení Dodatku V:
  - System 3.
7. V případě prohlášení o vlastnostech stavebního výrobku zahrnutého v harmonizované normě:
  - TÜV Rheinland LGA Products GmbH, identifikační číslo: 0197. Proveden test podle EN 12050-1 nebo EN 12050-2 (SL1.50) v systému 3.  
(popis úkolů třetí strany podle ustanovení Dodatku V)  
– Číslo certifikátu: Certifikát LGA č. 7381115.  
Typ testován a monitorován.
8. NESOUVISL.
9. Prohlašované vlastnosti:  
Výrobky uvedené v tomto Prohlášení o vlastnostech jsou v souladu se základními charakteristikami a požadavky na vlastnosti, jak je popsáno níže:
  - Použité normy: EN 12050-1:2001 nebo EN 12050-2:2000 (SL1.50).
10. Vlastnosti výrobku uvedeného v bodech 1 a 2 v souladu s prohlašovanými vlastnostmi v bodě 9.

**DE:**

**EU-Leistungserklärung gemäß Anhang III der Verordnung (EU) Nr. 305/2011 (Bauprodukte-Verordnung)**

1. Einmalige Kennnummer des Produkttyps:
  - EN 12050-1 oder EN 12050-2 (SL1.50).
2. Typ, Charge, Seriennummer oder jedes andere Element, das eine Identifizierung des Bauprodukts erlaubt, wie in Artikel 11 (4) vorgeschrieben.
  - SL1-, SLV-Pumpen, auf dem Typenschild mit EN 12050-1 oder EN 12050-2 (SL1.50) gekennzeichnet.
3. Verwendungszweck oder Verwendungszwecke des Bauprodukts, gemäß den geltenden harmonisierten technischen Spezifikationen, wie vom Hersteller vorgesehen:
  - Pumpen für die Förderung von fäkalienhaltigem Abwasser, auf dem Typenschild mit EN 12050-1 gekennzeichnet.
  - SL1.50-Pumpen für die Förderung von fäkalienfreiem Abwasser, auf dem Typenschild mit EN 12050-2 gekennzeichnet.
4. es Warenzeichen und Kontaktanschrift des Herstellers, wie in Artikel 11(5) vorgeschrieben.
  - Grundfos Holding A/S  
Poul Due Jensens Vej 7  
8850 Bjerringbro  
Dänemark
5. NICHT RELEVANT.
6. System oder Systeme zur Bewertung und Überprüfung der Leistungsbeständigkeit des Bauprodukts gemäß Anhang V:
  - System 3.
7. Bei der Leistungserklärung bezüglich eines von einer harmonisierten Norm erfassten Bauprodukts:
  - TÜV Rheinland LGA Products GmbH, Kennnummer: 0197. Vorgenommene Prüfung gemäß EN 12050-1 oder EN 12050-2 (SL1.50) unter Anwendung von System 3.  
(Beschreibung der Aufgaben von unabhängigen Dritten gemäß Anhang V)
  - Zertifikatnummer: LGA-Zertifikatnr. 7381115. Typgeprüft und überwacht.
8. NICHT RELEVANT.
9. Erklärte Leistung:  
Die von dieser Leistungserklärung erfassten Produkte entsprechen den grundlegenden Charakteristika und Leistungsanforderungen, wie im Folgenden beschrieben:
  - Angewendete Normen: EN 12050-1:2001 oder EN 12050-2:2000 (SL1.50).
10. Die Leistung des in Punkt 1 und 2 genannten Produkts entspricht der in Punkt 9 erklärten Leistung.

**DK:**  
**EU-ydeevnedeklaration i henhold til bilag III af  
forordning (EU) nr. 305/2011  
(Byggevareforordningen)**

1. Varietypens unikke identifikationskode:
  - EN 12050-1 eller EN 12050-2 (SL1.50).
2. Type-, parti- eller serienummer eller en anden form for angivelse ved hjælp af hvilken byggevaren kan identificeres som krævet i henhold til artikel 11, stk. 4:
  - SL1-, SLV-pumper der er mærket med EN 12050-1 eller EN 12050-2 (SL1.50) på typeskilte.
3. Byggevarens tilsligtede anvendelse eller anvendelser i overensstemmelse med den gældende harmoniserede tekniske specifikation som påtænkt af fabrikanten:
  - Pumper til pumpning af spildevand med fækalier der er mærket med EN 12050-1 på typeskilte.
  - SL1.50-pumper til pumpning af fækaliefrit spildevand der er mærket med EN 12050-2 på typeskilte.
4. Fabrikantens navn, registrerede firmabetegnelse eller registrerede varemærke og kontaktdresse som krævet i henhold til artikel 11, stk. 5:
  - Grundfos Holding A/S  
Poul Due Jensens Vej 7  
8850 Bjerringbro  
Danmark.
5. IKKE RELEVANT.
6. Systemet eller systemerne til vurdering og kontrol af at byggevarens ydeevne er konstant, jf. bilag V:
  - System 3.
7. Hvis ydeevnedeklarationen vedrører en byggevare der er omfattet af en harmoniseret standard:
  - TÜV Rheinland LGA Products GmbH, identifikationsnummer: 0197.  
Udført test i henhold til EN 12050-1 eller EN 12050-2 (SL1.50) efter system 3  
(beskrivelse af tredjepartsopgaverne, jf. bilag V).
  - Certifikatnummer: LGA-certifikat nr. 7381115. Typestest og overvåget.
8. IKKE RELEVANT.
9. Deklareret ydeevne:  
De produkter der er omfattet af denne ydeevnedeklaration, er i overensstemmelse med de væsentlige egenskaber og ydelseskrav der er beskrevet i følgende:
  - Anvendt standarder: EN 12050-1:2001 eller EN 12050-2:2000 (SL1.50).
10. Ydeevnen for den byggevare der er anført i punkt 1 og 2, er i overensstemmelse med den deklarerede ydeevne i punkt 9.

**EE:**  
**EU toimivusdeklaratsioon on kooskõlas EU  
normatiivi nr. 305/2011 Lisa III  
(Ehitustoodete normid)**

1. Toote tübi ainulaadne identifiseerimis kood:
  - EN 12050-1 või EN 12050-2 (SL1.50).
2. Tüübi-, parti- või tootenumber või mõni teine element mis võimaldab kindlaks teha, et ehitustoodete vastab artikli 11(4):
  - SL1, SLV pumpadel on andmeplaadil märgistus EN 12050-1 või EN 12050-2 (SL1.50).
3. Ehitustoodete on ettenähtud kasutamiseks vastavalt tootja poolt etteantud kasutusaladel järgides tehnilisi ettekirjutusi.
  - Andmeplaadil märgitud EN 12050-1 pumbad on mõeldud fekaale sisaldava hõltee pumpamiseks.
  - Andmeplaadil märgitud EN 12050-2 (SL1.50) pumbad on mõeldud fekaale mittesisaldava hõltee pumpamiseks.
4. Nimetus, registreeritud kaubamärk või registreeritud kaubamärk ja kontaktadress tootjafirmast peavad olema vastavuses Artikkel 11(5):
  - Grundfos Holding A/S  
Poul Due Jensens Vej 7  
8850 Bjerringbro  
Taani.
5. POLE OLULINE.
6. Süsteemi või süsteemi hindamine ja kinnitamine püsiva jõudlusega ehitustooteks nagu on kirjas Lisa V:
  - Süsteem 3.
7. Toimivusdeklaratsioon järgib ehitustoodete standarditest:
  - TÜV Rheinland LGA Products GmbH, identifitseerimis number: 0197.  
Testitud vastavalt EN 12050-1 või EN 12050-2 (SL1.50) järgi süsteem 3.  
(kolmandate osapoolte ülesanded nagu on kirjas Lisa V)
  - Sertifikaadi number: LGA-Sertifikaadi Nr 7381115.  
Tüüpatestitud ja jälgitud.
8. POLE OLULINE.
9. Avaldatud jõudlus:  
Toode, mille kohta antud toimivusdeklaratsioon kehitib, on vastavuses põhiomadustega ja jõudlus vajadustega nagu järgnevalt kirjutatud:
  - Kasutatud standardid: EN 12050-1:2001 või EN 12050-2:2000 (SL1.50).
10. Toote tuvastatud jõudlus punktides 1 ja 2 on vastavuses toimivusdeklaratsiooni punkti 9.

**ES:**

**Declaración UE de prestaciones conforme al Anexo III del Reglamento (UE) n.º 305/2011 (Reglamento de productos de construcción)**

1. Código de identificación único del tipo de producto:
  - EN 12050-1 o EN 12050-2 (SL1.50).
2. Tipo, lote o número de serie, o cualquier otro elemento que facilite la identificación del producto de construcción de acuerdo con los requisitos establecidos en el Artículo 11(4):
  - Bombas SL1, SLV en cuya placa de características figure la norma EN 12050-1 o EN 12050-2 (SL1.50).
3. Uso o usos previstos del producto de construcción, conforme a la especificación técnica armonizada correspondiente, según lo previsto por el fabricante:
  - Bombas para el bombeo de aguas residuales que contengan materia fecal en cuya placa de características figure la norma EN 12050-1.
  - Bombas SL1.50 para el bombeo de aguas residuales que contengan materia fecal en cuya placa de características figure la norma EN 12050-2.
4. Nombre, nombre comercial registrado o marca comercial registrada y domicilio de contacto del fabricante de acuerdo con los requisitos establecidos en el Artículo 11(5):
  - Grundfos Holding A/S  
Poul Due Jensens Vej 7  
8850 Bjerringbro  
Dinamarca.
5. NO CORRESPONDE.
6. Sistema o sistemas de evaluación y verificación de la continuidad de las prestaciones del producto de construcción, de acuerdo con lo establecido en el Anexo V.
  - Sistema 3.
7. Si la declaración de prestaciones concierne a un producto de construcción cubierto por una norma armonizada:
  - TÜV Rheinland LGA Products GmbH, número de identificación: 0197.  
Ensayo ejecutado según las normas EN 12050-1 o EN 12050-2 (SL1.50), sistema 3.  
(Descripción de las tareas de las que deben responsabilizarse otras partes de acuerdo con lo establecido en el Anexo V).
  - Número de certificado: Certificado LGA n.º 7381115. Tipo sometido a ensayo y monitorizado.
8. NO CORRESPONDE.
9. Prestaciones declaradas:  
Los productos que cubre esta declaración de prestaciones satisfacen las características fundamentales y requisitos en materia de prestaciones descritos en:
  - Normas aplicadas: EN 12050-1:2001 o EN 12050-2:2000 (SL1.50).
10. Las prestaciones del producto indicado en los puntos 1 y 2 cumplen lo declarado en el punto 9.

**FI:**

**EU-suoritustasoilmoitus laadittu asetuksen 305/2011/EU liitteen III mukaisesti (Rakennustuoteasetus)**

1. Tuotetyypin yksilöllinen tunniste:
  - EN 12050-1 tai EN 12050-2 (SL1.50).
2. Typpi-, erä- tai sarjanumero tai muu merkintä, jonka ansiosta rakennustuotteet voidaan tunnistaa, kuten 11 artiklan 4 kohdassa edellytetään:
  - SL1-, SLV-pumput, joiden arvokilvessä on merkintä EN 12050-1 tai EN 12050-2 (SL1.50).
3. Valmistajan ennakoima, sovellettavan yhdenmukaistetun teknisen erityisominaisuuden mukainen rakennustuotteen aiottu käyttötarkoitus tai -tarkoitukset:
  - Pumput ulosteperaistä materiaalia sisältävien jätevesien pumpaukseen. Arvokilvessä on merkintä EN 12050-1.
  - SL1.50 pumput sellaisten jätevesien pumpaukseen, jotka eivät sisällä ulosteperaistä materiaalia. Arvokilvessä on merkintä EN 12050-2.
4. Valmistajan nimi, rekisteröity kauppanimi tai tavaramerkki sekä osoite, josta valmistajaan saa yhteyden, kuten 11 artiklan 5 kohdassa edellytetään:
  - Grundfos Holding A/S  
Poul Due Jensens Vej 7  
8850 Bjerringbro  
Tanska.
5. EI TARVITA.
6. Rakennustuotteen suoritustason pysyvyyden arviointi- ja varmennusjärjestelmä(t) liitteen V mukaisesti:
  - Järjestelmä 3.
7. Kun kyse on yhdenmukaistetun standardin piirin kuuluvan rakennustuotteen suoritustasoilmoituksesta:
  - TÜV Rheinland LGA Products GmbH, tunnistumerkki: 0197.  
Testaus suoritettiin standardien EN 12050-1 tai EN 12050-2 (SL1.50) ja järjestelmän 3 mukaisesti.  
(Liitteessä V esitettyjä kolmannen osapuolen tehtävien kuvauksia noudatetaan.)
  - Sertifikaatin numero: LGA-sertifikaatti nro 7381115.  
Tyyppitestattu ja valvottu.
8. EI TARVITA.
9. Ilmoitettu suoritustasot:  
Tähän suoritustasoilmoitukseen kuuluvien tuotteiden perusominaisuudet ja suoritustasovatimukset:
  - Sovellettuva standardi: EN 12050-1:2001 tai EN 12050-2:2000 (SL1.50).
10. Kohdissa 1 ja 2 yksilöidyn tuotteen suoritustasot ovat kohdassa 9 ilmoitettujen suoritustasojen mukaiset.

**Déclaration des performances UE  
conformément à l'Annexe III du Règlement (UE)  
n° 305/2011  
(Règlement Produits de Construction)**

1. Code d'identification unique du type de produit :
  - EN 12050-1 ou EN 12050-2 (SL1.50).
2. Numéro de type, de lot ou de série ou tout autre élément permettant l'identification du produit de construction comme l'exige l'article 11(4) :
  - Pompe SL1, SLV marquées EN 12050-1 ou EN 12050-2 (SL1.50) sur la plaque signalétique.
3. Usage(s) prévu(s) du produit de construction conformément à la spécification technique harmonisée applicable comme indiqué par le fabricant :
  - Pompe pour la collecte des effluents contenant des matières fécales marquées EN 12050-1 sur la plaque signalétique.
  - Pompe SL1.50 pour la collecte des effluents exempts de matières fécales marquées EN 12050-2 sur la plaque signalétique.
4. Nom, nom de commerce déposé ou marque commerciale déposée et adresse du fabricant comme l'exige l'article 11(5) :
  - Grundfos Holding A/S  
Poul Due Jensens Vej 7  
8850 Bjerringbro  
Danemark.
5. NON APPLICABLE.
6. Système ou systèmes d'attestation et de vérification de la constance des performances du produit de construction comme stipulé dans l'Annexe V :
  - Système 3.
7. En cas de déclaration des performances d'un produit de construction couvert par une norme harmonisée :
  - TÜV Rheinland LGA Products GmbH, numéro d'identification : 0197.  
Test effectué conformément aux normes EN 12050-1 ou EN 12050-2 (SL1.50) selon le système 3.  
(description des tâches de tierce partie comme stipulé dans l'Annexe V)
  - Numéro de certificat : Certificat LGA n° 7381115. Contrôlé et homologué.
8. NON APPLICABLE.
9. Performances déclarées :  
Les produits couverts par cette déclaration des performances sont conformes aux caractéristiques essentielles et aux exigences de performances décrites par la suite :
  - Normes utilisées : EN 12050-1:2001 ou EN 12050-2:2000 (SL1.50).
10. Les performances du produit identifié aux points 1 et 2 sont conformes aux performances déclarées au point 9.

**Δήλωση απόδοσης ΕΕ σύμφωνα με το  
Παράρτημα III του Κανονισμού (ΕΕ)  
Αρ. 305/2011  
(Κανονισμός για Προϊόντα του Τομέα Δομικών  
Κατασκευών)**

1. Μοναδικός κωδικός ταυτοποίησης του τύπου του προϊόντος:
  - EN 12050-1 ή EN 12050-2 (SL1.50).
2. Αριθμός τύπου παρτίδας ή σειράς ή οποιοδήποτε άλλο στοιχείο επιτρέπει την ταυτοποίηση του προϊόντος του τομέα των δομικών κατασκευών όπως απαιτείται δυνάμει του Αρθρου 11(4):
  - Αντλίες SL1, SLV με σήμανση EN 12050-1 ή EN 12050-2 (SL1.50) στην πινακίδα.
3. Προτεινόμενη χρήση ή χρήσεις του προϊόντος του τομέα δομικών κατασκευών, σύμφωνα με την ισχύουσα εναρμονισμένη τεχνική προδιαγραφή, όπως προβλέπεται από τον κατασκευαστή:
  - Αντλίες για άντληση ακάθαρτων υδάτων που περιέχουν περιτώματα με σήμανση EN 12050-1 στην πινακίδα.
  - Αντλίες SL1.50 για άντληση ακάθαρτων υδάτων χωρίς περιτώματα με σήμανση EN 12050-2 στην πινακίδα.
4. Όνομα, εμπορική εταιρευματική σήμα κατατεθέν και διεύθυνση επικοινωνίας του κατασκευαστή όπως απαιτείται δυνάμει του Αρθρου 11(5):
  - Grundfos Holding A/S  
Poul Due Jensens Vej 7  
8850 Bjerringbro  
Δανία.
5. ΜΗ ΣΧΕΤΙΚΟ.
6. Σύστημα ή συστήματα αξιολόγησης και επαλήθευσης της σταθερότητας της απόδοσης του προϊόντος του τομέα δομικών κατασκευών όπως καθορίζεται στο Παράρτημα V:
  - Σύστημα 3.
7. Σε περίπτωση δήλωσης απόδοσης που αφορά προϊόν του τομέα δομικών κατασκευών το οποίο καλύπτεται από ?εναρμονισμένο πρότυπο:
  - TÜV Rheinland LGA Products GmbH, αριθμός ταυτοποίησης: 0197.  
Διενήργηση δοκιμή σύμφωνα με τα EN 12050-1 ή EN 12050-2 (SL1.50) βάσει του συστήματος 3.  
(περιγραφή των καθηκόντων του τρίτου μέρους όπως καθορίζονται στο Παράρτημα V)
  - Αριθμός πιατοποιητικού: Πιατοποιητικό LGA Αρ. 7381115.  
Έχει υποβληθεί σε δοκιμή τύπου και παρακολουθείται.
8. ΜΗ ΣΧΕΤΙΚΟ.
9. Δήλωση απόδοση:
 

Τα πρόιόντα που καλύπτονται από την παρόύσα δήλωση απόδοσης συμμορφώνονται με τα ουσιώδη χαρακτηριστικά και τις απαιτήσεις απόδοσης όπως περιγράφεται στα ακόλουθα:

  - Πρότυπα που χρησιμοποιήθηκαν: EN 12050-1:2001 ή EN 12050-2:2000 (SL1.50).
10. Η απόδοση του προϊόντος που ταυτοποιήθηκε στα σημεία 1 και 2 συμμορφώνεται με τη δηλώσεις απόδοση στο σημείο 9.

**EU teljesítménynyilatkozat a 305/2011 számú  
EU rendelet III. mellékletének megfelelően  
(Építési termék rendelet)**

1. A terméktípus egyedi azonosító kódja:
  - EN 12050-1 vagy EN 12050-2 (SL1.50).
2. Tipus, adag, sorozatszám, vagy bármilyen más olyan elem, amely lehetővé teszi az építési terméknek a 11. cikk (4) bekezdése alapján megkövetelt azonosítását:
  - SL1, SLV szivattyúk, EN 12050-1 vagy EN 12050-2 (SL1.50) jelöléssel az adattáblán.
3. Az építési termék tervezett felhasználása vagy felhasználásai, a vonatkozó harmonizált műszaki előírásoknak megfelelően, a gyártó szándéka szerint:
  - Fekáliaztartalmú szennyvíz szivattyúsára szolgáló szivattyúk, EN 12050-1 jelöléssel az adattáblán.
  - Fekálialementes szennyvíz szivattyúsára szolgáló SL1.50 szivattyú, EN 12050-2 jelöléssel az adattáblán.
4. A gyártó neve, védjegye, bejegyzett kereskedelmi neve és értesítési címe a 11. cikk (5) bekezdése alapján megkövetelt módon:
  - Grundfos Holding A/S  
Poul Due Jensens Vej 7  
8850 Bjerringbro  
Dánia.
5. NEM RELEVÁNS.
6. Az építési termék teljesítmény állandóságának értékelésére és ellenőrzésére vonatkozó rendszer vagy rendszerek, az V. mellékletben meghatározott módon:
  - 3-as rendszer.
7. Olyan építési termékre vonatkozó teljesítménynyilatkozat esetén, amelyre kiterjed egy harmonizált szabvány:
  - TÜV Rheinland LGA Products GmbH, azonosító szám: 0197. Az EN 12050-1 vagy EN 12050-2 (SL1.50) szerint elvégzett teszt, a 3-as rendszer keretében.  
(harmadik fél feladatainak leírása az V. mellékletben meghatározott módon)
  - Tanúsítvány száma: LGA-Tanúsítvány száma 7381115.  
Tipuszetelvée és felügyelő.
8. NEM RELEVÁNS.
9. Megadott teljesítmény:  
Azok a termékek, amelyekre ez a teljesítménynyilatkozat vonatkozik, rendelkeznek azokkal az alapvető jellemzőkkel és kielégítik azokat a teljesítményre vonatkozó követelményeket, amelyeket alább ismertetünk:
  - Alkalmazott szabványok: EN 12050-1:2001 vagy EN 12050-2:2000 (SL1.50).
10. Az 1-es és 2-es pontban azonosított termék teljesítménye összhangban van a 9. pontban megadott teljesítmennel.

**EB eksplotacinių savybių deklaracija pagal reglamento (ES) Nr. 305/2011 III priedą  
(Statybos produkto reglamentas)**

1. Unikalus produkto tipo identifikacinis kodas:
  - EN 12050-1 arba EN 12050-2 (SL1.50).
2. Tipo, partijos ar serijos numeris ar bet koks kitas elementas, pagal kurį galima identifikuoti statybos produktą, kaip reikalaujama pagal 11 straipsnio 4 dalį:
  - SL1, SLV siurbilai, vardinėje plokštéléje pažymėti EN 12050-1 arba EN 12050-2 (SL1.50).
3. Gamintojo numatyta statybos produkto naudojimo paskirtis ar paskirtys pagal taikomą darniąja techninę specifikaciją:
  - Siurbiliai, skirti išsiurbti nuotekas, kurių sudėtyje yra fekalijų, vardinėje plokštéléje pažymėti EN 12050-1.
  - SL1.50 siurbiliai, skirti išsiurbti nuotekas, kurių sudėtyje nėra fekalijų, vardinėje plokštéléje pažymėti EN 12050-2.
4. Gamintojo pavadinimas, registruotas komercinis pavadinimas arba registruotas prekės ženklas ir kontaktinis adresas, kaip reikalaujama pagal 11 straipsnio 5 dalį:
  - Grundfos Holding A/S  
Poul Due Jensens Vej 7  
8850 Bjerringbro  
Danija.
5. **NETAIKYTINA.**
6. Statybos produkto eksplotacinių savybių pastovumo vertinimo ir tikrinimo sistema ar sistemos, kaip nustatyta V priede:
  - Sistema 3.
7. Eksplotacinių savybių deklaracijos, susijusios su statybos produkту, kuriam taikomas darnusis standartas, atveju:
  - „TÜV Rheinland LGA Products GmbH“, identifikacinis numeris: 0197.  
atitinkanti bandymų pagal sistemą 3.  
(trečiosios šalių užduočių, kaip nustatyta V priede,  
aprašymas)
  - Sertifikato numeris: LGA sertifikatas Nr. 7381115. Tipas patikrintas ir stebimas.
8. **NETAIKYTINA.**
9. Deklaruojamas eksplotacinių savybės:

Produktai, kuriuos apima ši eksplotacinių savybių deklaracija, atitinka esmines charakteristikas ir eksplotacinių savybių reikalavimus, kaip aprašyta:

  - Taikomi standartai: EN 12050-1:2001 arba EN 12050-2:2000 (SL1.50).
10. 1 ir 2 punktuose nurodyto produkto eksplotacinių savybės atitinką 9 punkte deklaruojamas eksplotacinių savybes.

**LV:**

**EK ekspluatācijas īpašību deklarācija saskaņā  
ar Regulas (ES) Nr. 305/2011 III pielikumu  
(Būvizstrādājumu regula)**

1. Unikāls izstrādājuma tipa identifikācijas numurs:  
– EN 12050-1 vai EN 12050-2 (SL1.50).
2. Tips, partijas vai sērijas numurs vai kāds cits būvizstrādājuma identifikācijas elements, kā noteikts 11. panta 4. punktā:  
– SL1, SLV sūkņi ar EN 12050-1 vai EN 12050-2 (SL1.50) apzīmējumu uz datu plāksnītes.
3. Būvizstrādājuma paredzētais izmantojums vai izmantojumi saskaņā ar piemērojamo saskapoto tehnisko specifikāciju, kā paredzējis ražotājs:  
– Izķārņumus sāturošo noteikēdu sūknēsanai paredzētie sūkņi ar EN 12050-1 apzīmējumu uz datu plāksnītes.  
– Izķārņumus nesāturošo noteikēdu sūknēsanai paredzētie SL1.50 sūkņi ar EN 12050-2 apzīmējumu uz datu plāksnītes.
4. Razotājai nosaukums, reģistrētai komercnosaukums vai reģistrētā preču zīme un kontaktadrese, kā noteikts 11. panta 5. punktā:  
– Grundfos Holding A/S  
Poul Due Jensens Vej 7  
8850 Bjerringbro  
Dānija.
5. NAV ATTIECINĀMS.
6. Ekspluatācijas īpašību noturības novērtējuma un pārbaudes sistēma vai sistemas, kā noteikts V pielikumā:  
– 3. sistēma.
7. Gadījumā, ja ekspluatācijas īpašību deklarācija attiecas uz būvizstrādājumu, kuram ir saskaņotais standarts:  
– TÜV Rheinland LGA Products GmbH, identifikācijas numurs: 0197.  
Pārbaudi veica saskaņā ar EN 12050-1 vai EN 12050-2 (SL1.50) atbilstoši 3. sistēmai.  
(V pielikumā izklāstīto trešo personu uzdevumu apraksts)  
– Sertifikāta numurs: LGA sertifikāts Nr. 7381115. Pārbaudīts un kontroļots atbilstoši tipam.
8. NAV ATTIECINĀMS.
9. Deklarētās ekspluatācijas īpašības Izstrādājumi, uz kuriem attiecas šī ekspluatācijas īpašību deklarācija, atbilst būtiskiem raksturielumiem un prasībām pret ekspluatācijas īpašībām, kas aprakstītas tālākminētajos dokumentos.  
– Piemērotie standarti: EN 12050-1:2001 vai EN 12050-2:2000 (SL1.50).
10. Pielikuma 1. un 2. punktā norādītā izstrādājuma ekspluatācijas īpašības atbilst 9. punktā norādītajām deklarētajām ekspluatācijas īpašībām.

7. Em caso de declaração de desempenho referente a um produto de construção abrangido por uma norma harmonizada:  
– TÜV Rheinland LGA Products GmbH, número de identificação: 0197.  
Teste realizado em conformidade com EN 12050-1 ou EN 12050-2 (SL1.50) ao abrigo do sistema 3.  
(descrição das tarefas de partes terceiras, conforme definido no Anexo V)  
– Número do certificado: Certificado LGA N.º 7381115. Testado e monitorizado.
8. NÃO RELEVANTE.
9. Desempenho declarado:  
Os produtos abrangidos por esta declaração de desempenho cumprem as características essenciais e os requisitos de desempenho conforme descritos em:  
– Normas utilizadas: EN 12050-1:2001 ou EN 12050-2:2000 (SL1.50).
10. O desempenho do produto identificado nos pontos 1 e 2 encontra-se em conformidade com o desempenho declarado no ponto 9.

**RO:**

**Declarație UE de performanță în conformitate cu anexa III a Regulamentului (UE) nr 305/2011 (reglementare privind produsele pentru construcții)**

1. Cod unic de identificare a tipului de produs:  
– EN 12050-1 sau EN 12050-2 (SL1.50).
2. Tipul, lotul sau seria, sau orice alt element care permite identificarea produsului pentru construcții după cum este necesar în conformitate cu articolul 11 (4):  
– Pompa SL1, SLV marcate cu EN 12050-1 sau EN 12050-2 (SL1.50) pe placa de identificare.
3. Utilizarea sau utilizările preconizate ale produsului pentru construcții, în conformitate cu specificația tehnică armonizată aplicabilă, astfel cum este prevăzut de către producător:  
– Pompa pentru pomparea apei uzate continănd materii fecale, marcate cu EN 12050-1 pe placă de identificare.  
– Pompe SL1.50 pentru pomparea apei uzate fără materii fecale, marcate cu EN 12050-2 pe placă de identificare.
4. Înregistrarea și adresa de contact a fabricantului cerute conform cu articolului 11 (5):  
– Grundfos Holding A/S  
Poul Due Jensens Vej 7  
8850 Bjerringbro  
Danemarca.
5. NU ESTE RELEVANT.
6. Sistemul sau sistemele de evaluare și verificare a constanței performanței produsului pentru construcții astfel cum este prevăzut în anexa V:  
– Sistemul 3.
7. În cazul declarației de performanță pentru un produs pentru construcții specificat într-un standard armonizat:  
– TÜV Rheinland LGA Products GmbH, număr de identificare: 0197.  
Test efectuat conform EN 12050-1 sau EN 12050-2 (SL1.50) potrivit sistemului 3.  
(descrierea sarcinilor trei părți așa cum este prevăzut în anexa V)  
– Numărul certificatului: LGA-Certificat nr. 7381115. Tip testat și monitorizat.
8. NU ESTE RELEVANT.
9. Performanță declarată:  
Produsele specificate de această declarație de performanță sunt în conformitate cu caracteristicile esențiale și cerințele de performanță descrise în cele ce urmăzează:  
– Standarde utilizate: EN 12050-1:2001 sau EN 12050-2:2000 (SL1.50).
10. Performanța produsului identificat la punctele 1 și 2 este în conformitate cu performanța declarată la punctul 9.

**RS:**

**EU deklaracija o performansama u skladu sa Aneksom III propisa (EU) br. 305/2011 (propis o konstrukciji proizvoda)**

1. Jedinstvena identifikaciona šifra tipa proizvoda:  
– EN 12050-1 ili EN 12050-2 (SL1.50).
2. Tip, serija ili serijski broj ili neki drugi element koji omogućava identifikaciju konstrukcije proizvoda, kako je propisano shodno Članu 11(4):  
– Pumpe SL1, SLV označene su sa EN 12050-1 ili EN 12050-2 (SL1.50) na natpisnoj pločici.
3. Predviđena namena ili predviđene namene konstruisanog proizvoda u skladu sa važećim i usklađenim tehničkim specifikacijama, kako je predviđeno proizvođač:  
– Pumpe za pumpanje otpadnih voda sa fekalnim materijama na natpisnoj pločici imaju oznaku EN 12050-1.  
– Pumpe SL1.50 za pumpanje otpadnih voda bez fekalnih materijala na natpisnoj pločici imaju oznaku EN 12050-2.
4. Naziv, registrirana trgovачka marka ili registrovani zaštitni znak i kontakt adresa proizvođača kako je propisano na osnovu Člana 11(5):  
– Grundfos Holding A/S  
Poul Due Jensens Vej 7  
8850 Bjerringbro  
Danska.
5. NIJE RELEVANTNO.
6. Sistemi ili sistemi za procenu i verifikaciju konstantnosti performansi konstruisanog proizvoda, kako je predviđeno u Aneksu V:  
– Sistem 3.
7. U slučaju deklaracije o performansama koja se odnosi na konstruisani proizvod koji je obuhvaćen usklađenim standardom:  
– TÜV Rheinland LGA Products GmbH, identifikacioni broj: 0197.  
Izvršeno ispitivanje u skladu sa EN 12050-1 ili EN 12050-2 (SL1.50) na osnovu sistema 3  
(opis zadataka treće strane kako je opisano u Aneksu V).  
– Broj sertifikata: LGA-sertifikat br. 7381115. Ispitivanje i praćenje tipa.
8. NIJE RELEVANTNO.
9. Deklarisane performanse:  
Proizvodi koji su obuhvaćeni ovom deklaracijom o performansama usklađeni su sa osnovnim karakteristikama i zahtevima za performansama, kako je nadalje opisano:  
– Korisćeni standardi: EN 12050-1:2001 ili EN 12050-2:2000 (SL1.50).
10. Performanse proizvoda identifikovanog u tačkama 1 i 2 u saglasnosti su s deklarisanim performansama u tački 9.

**RU:**  
**Декларация ЕС о рабочих характеристиках согласно Приложению III Регламента (ЕС) № 305/2011**  
**(Регламент на конструкционные, строительные материалы и продукцию)**

1. Код однозначной идентификации типа продукции:  
– EN 12050-1 или EN 12050-2 (SL1.50).
2. Тип, номер партии, серийный номер или любой другой параметр, обеспечивающий идентификацию строительного оборудования согласно Статье 11(4):  
– Насосы SL1, SLV имеют обозначение EN 12050-1 или EN 12050-2 (SL1.50) на фирменной табличке.
3. Целевое применение или применение строительного оборудования в соответствии с примененными согласованными техническими условиями, предусмотренными производителем:  
– Насосы для перекачки сточных вод с фекалиями имеют обозначение EN 12050-1 на фирменной табличке.  
– Насосы SL1, SLV для перекачки сточных вод без фекалий имеют обозначение EN 12050-2 на фирменной табличке.
4. Название, зарегистрированное торговое имя или зарегистрированная торговая марка и контактный адрес производителя согласно Статье 11(5):  
– Grundfos Holding A/S  
Poul Due Jensens Vej 7  
8850 Bjerringbro  
Дания.
5. НЕ ИСПОЛЬЗУЕТСЯ.
6. Система или системы оценки и проверки постоянства рабочих характеристик строительного оборудования согласно Приложению V:  
– Система 3.
7. Если декларация о рабочих характеристиках касается строительного оборудования, предусмотренного согласованным стандартом:  
– TÜV Rheinland LGA Products GmbH, идентификационный номер: 0197.  
Испытания выполнено согласно EN 12050-1 или EN 12050-2 (SL1.50) в системе 3.  
(описание задач третьей стороны согласно Приложению V)  
– Номер сертификата: LGA-Сертификат № 7381115. Прошёл типовые испытания и контроль.
8. НЕ ИСПОЛЬЗУЕТСЯ.
9. Заявленные технические характеристики:  
Оборудование, подпадающее под настоящую декларацию о технических характеристиках, соответствует существенным характеристикам и требованиям к рабочим характеристикам, указанным ниже:  
– Применимые стандарты: EN 12050-1:2001 или EN 12050-2:2000 (SL1.50).
10. Технические характеристики оборудования, указанные в пунктах 1 и 2, соответствуют заявленным техническим характеристикам из пункта 9.

**SE:**  
**EU prestandadeklaration enligt bilaga III till förfördering (EU) nr 305/2011  
(byggproduktförordningen)**

1. Produkttypens unika identifikationskod:  
– EN 12050-1 eller EN 12050-2 (SL1.50).
2. Typ-, parti- eller serienummer eller någon annan beteckning som möjliggör identifiering av byggprodukter i enlighet med artikel 11:4:  
– SL1-, SLV-pumpar märkta med EN 12050-1 eller EN 12050-2 (SL1.50) på typskylten.
3. Byggprodukten avsedda användning eller användningar i enlighet med den tillämpliga, harmoniseraade tekniska specifikationen, såsom förutsatt av tillverkaren:  
– Pumpar för pumpning av avloppsvatten innehållande fekalier märkta med EN 12050-1 på typskylten.  
– SL1.50-pumpar för pumpning av fekaliefrött avloppsvatten märkta med EN 12050-2 på typskylten.
4. Tillverkarens namn, registrerade företagsnamn eller registrerade varumärke samt kontaktadress enligt vad som krävs i artikel 11:5:  
– Grundfos Holding A/S  
Poul Due Jensens Vej 7  
8850 Bjerringbro  
Danmark.
5. EJ TILLÄMLIGT.
6. Systemet eller systemen för bedömning och fortlöpande kontroll av byggproduktenens prestanda enligt bilaga V:  
– System 3.
7. För det fall att prestandadeklarationen avser en byggprodukt som omfattas av en harmonisering standard:  
– TÜV Rheinland LGA Products GmbH, identifikationsnummer: 0197.  
Utförde provning enligt EN 12050-1 eller EN 12050-2 (SL1.50) under system 3.  
(beskrivning av tredje parts uppgifter såsom de anges i bilaga V)  
– Certifikat nummer: LGA-certifikat nr 7381115. Typrovad och övervakad.
8. EJ TILLÄMLIGT.
9. Angiven prestanda:  
Produkterna som omfattas av denna prestandadeklaration överensstämmer med de väsentliga egenskaperna och prestandakraven i följande:  
– Tillämpade standarder: EN 12050-1:2001 eller EN 12050-2:2000 (SL1.50).
10. Prestandan för den produkt som anges i punkterna 1 och 2 överensstämmer med den prestanda som anges i punkt 9.

**SI:**

**Izjava EU o delovanju v skladu z Dodatkom III  
Uredbe (EU) št. 305/2011  
(uredba o gradbenih proizvodih)**

1. Edinstvena identifikacijska koda za tip izdelka:  
 - EN 12050-1 ali EN 12050-2 (SL1.50).
2. Tip, serijska številka ali kateri koli drug element, ki dovoljuje identifikacijo gradbenega proizvoda, kot to zahteva člen 11(4):  
 - Črpalke SL1, SLV z oznako EN 12050-1 ali EN 12050-2 (SL1.50) na tipski ploščici.
3. Predvidena uporaba gradbenega proizvoda v skladu z veljavnimi harmoniziranimi tehničnimi specifikacijami, kot jo predvideva projekcija:  
 - Črpalke za črpjanje odpadne vode, ki vsebuje fekalije, z oznako EN 12050-1 na tipski ploščici.  
 - Črpalke SL1.50 za črpjanje odpadne vode, ki ne vsebuje fekalij, z oznako EN 12050-2 na tipski ploščici.
4. Ime, registrirano trgovsko ime ali registrirana blagovna znamka in naslov priznajalca, kot zahteva člen 11(5):  
 - Grundfos Holding A/S  
     Poul Due Jensens Vej 7  
     8850 Bjerringbro  
     Dánsko.
5. NI POMEMBNO.
6. Sistem ali sistemi ocenjevanja in preverjanja stalnosti delovanja gradbenega proizvoda, kot je opredeljeno v Dodatku V:  
 - Sistemi 3.
7. Če izjava o delovanju gradbenega proizvoda pokriva harmonizirani standard:  
 - TÜV Rheinland LGA Products GmbH, identifikacijska številka: 0197.  
 Test izveden v skladu z EN 12050-1 ali EN 12050-2 (SL1.50) v sklopu sistema 3.  
 (opis nalog trejte osebe, kot to določa Dodatek V)  
 - Številka certifikata: Certifikat LGA št. 7381115. Testirano glede tipa in nadzorovano.
8. NI POMEMBNO.
9. Deklarirano delovanje:  
 Proizvodi, ki jih krige ta izjava o delovanju, so skladni z bistvenimi lastnostmi in zahtevami delovanja, kot je opisano v nadaljevanju:  
 - Uporabljeni standardi: EN 12050-1:2001 ali EN 12050-2:2000 (SL1.50).
10. Delovanje proizvoda, identificiranega pod točkama 1 in 2, je skladno z deklariranim delovanjem pod točko 9.

**SK:**

**Vyhľásenie o parametroch EU v súlade s prílohou III nariadenia (EÚ) č. 305/2011  
(Nariadenie o stavebných výrobkoch)**

1. Jedinečný identifikačný kód typu výrobku:  
 - EN 12050-1 alebo EN 12050-2 (SL1.50).
2. Typ, číslo výrobcnej dávky alebo sériové číslo, alebo akýkoľvek iný pravik umožňujúci identifikáciu stavebného výrobku, ako sa vyžaduje podľa článku 11 ods. 4:  
 - Čerpadlá SL1, SLV s označením EN 12050-1 alebo EN 12050-2 (SL1.50) na typovom štítku.
3. Zamysľané použitie stavebného výrobku, ktoré uvádzá výrobca, v súlade s uplatnenou harmonizovanou technickou špecifikáciou:  
 - Čerpadlá určené na čerpanie spašákov s obsahom fekalí z označením EN 12050-1 na typovom štítku.  
 - Čerpadlá SL1.50 určené na čerpanie spašákov bez obsahu fekalí z označením EN 12050-2 na typovom štítku.
4. Názov, registrovaný obchodný názov alebo registrovaná obchodná značka a kontaktná adresa výrobcu podľa požiadaviek článku 11, ods. 5:  
 - Grundfos Holding A/S  
     Poul Due Jensens Vej 7  
     8850 Bjerringbro  
     Dánsko.
5. NEVZŤAHUJE SA.
6. System alebo systémy posudzovania a overovania nemennosti parametrov stavebného výrobku podľa ustanovení prílohy V:  
 - Systém 3.
7. V prípade vyhlásenia o parametroch týkajúceho sa stavebného výrobku, na ktorý sa vzťahuje harmonizovaná norma:  
 - TÜV Rheinland LGA Products GmbH, identifikačné číslo: 0197.  
 Vykonal skúšku podľa EN 12050-1 alebo EN 12050-2 (SL1.50) v systéme 3.  
 (popis uloh tretej strany, ako sa uvádzajú v prílohe V)  
 - Číslo certifikátu: Certifikát LGA č. 7381115. Typovo skúšaný a monitorovaný.
8. NEVZŤAHUJE SA.
9. Deklarované parametre:  
 Výrobky, na ktoré sa vzťahuje toto vyhlásenie o parametroch, vyhovujú podstatnými vlastnosťami a parametrami nasledovne:  
 - Použité normy: EN 12050-1:2001 alebo EN 12050-2:2000 (SL1.50).
10. Parametre výrobku uvedené v bodech 1 a 2 sú v zhode s deklarovanými parametrami v bode 9.

TR:

**305/2011 sayılı AB Yönetmeliği Ek III'e uygun olarak performans beyanı (İnşaat Ürünü Yönetmeliği)**

1. Ürün tipi özel tanımlama kodu:
  - EN 12050-1 veya EN 12050-2 (SL1.50).
2. Gerekен şekil inşaat ürününün Maddie 11(4)'e göre tanımlamasına izin veren tip, parti, seri numarası veya başka bir öge:
  - Etiketinde EN 12050-1 veya EN 12050-2 (SL1.50) ifadesi yer alan SL1, SLV pompaları.
3. Üretici tarafından onaylanan teknik özelliklerin inşaat ürününün amaca uygun kullanımını ve kullanımları:
  - Dışkı içeren atık suların pompalanmasına yönelik, etiketinde EN 12050-1 bilgisi bulunan pompalar.
  - Dışkı içermeyen atık suların pompalanmasına yönelik, etiketinde EN 12050-2 bilgisi bulunan SL1.50 pompalar.
4. Maddie 11(5)'e göre gerekken şekilde üreticinin adı, tescilli ticari adı veya tescilli ticari markası ve iletişim adresi:
  - Grundfos Holding A/S  
Poul Due Jensens Vej 7  
8850 Bjerringbro  
Danimarka.
5. **ILGİLİ DEĞİL.**
6. Ek V'te belirtilen şekilde inşaat ürününün performansının tutarlılığının değerlendirilmesi ve doğrulanmasına yönelik sistem veya sistemler:
  - Sistem 3.
7. Uyumlulu standart kapsamındaki bir inşaat ürünüyle ilgili performans beyanı durumunda:
  - TÜV Rheinland LGA Products GmbH, tanımlama numarası: 0197.  
EN 12050-1 veya EN 12050-2 (SL1.50)'e göre sistem 3 altında gerçekleştirilen test.  
(Ek V'te belirtilen şekilde üçüncü taraf işlemlerin açıklaması)
  - Sertifika numarası: LGA Sertifika No. 7381115. Tip test edilmiş ve izlenmiştir.
8. **ILGİLİ DEĞİL.**
9. Beyan edilen performans:  
Bu performans beyanı kapsamına giren ürünler, aşağıda belirtilen şekilde temel özelliklere ve performans gereklisimlerine uygundur:
  - Kullanılan standartlar: EN 12050-1:2001 veya EN 12050-2:2000 (SL1.50).
10. 1. ve 2. noktalarda belirtilen ürünün performansı, 9. noktada beyan edilen performansa uygundur.

UA:

**Декларація ЄС щодо технічних характеристик згідно з Додатком III Регламенту (ЄС) № 305/2011 (Регламент на конструкційні будівничі матеріали і продукцію)**

1. Код однозначної ідентифікації типу продукту:
  - EN 12050-1 або EN 12050-2 (SL1.50).
2. Тип, номер партії, номер серії або інший параметр, що дозволяє ідентифікувати продукт для встановлення в будівлях згідно Статті 11(4):
  - Насоси SL1, SLV мають на фірмовій табличці позначення EN 12050-1 або EN 12050-2 (SL1.50).
3. Цільове використання продукту для встановлення в будівлях згідно застосовних погоджених технічних умов, зазначених виробником:
  - Насоси для перекачування стічних вод з фекаліями мають позначення EN 12050-1 на фірмовій табличці.
  - Насоси SL1.50 для перекачування стічних вод без фекалій мають позначення EN 12050-2 на фірмовій табличці.
4. Назва, зареєстроване торгове ім'я або зареєстрована торговага марка та контактна адреса виробника згідно Статті 11(5):
  - Grundfos Holding A/S  
Poul Due Jensens Vej 7  
8850 Bjerringbro  
Дания.
5. НЕ ЗАСТОСОВУЄТЬСЯ.
6. Система або системи оцінки і перевірки постійності робочих характеристик продукту для встановлення в будівлях згідно Додатку V:
  - Система 3.
7. Якщо декларація щодо робочих характеристик стосується продукту для встановлення в будівлях, що підпадає під узгодженій стандарт:
  - TÜV Rheinland LGA Products GmbH, ідентифікаційний номер: 0197.  
Перевірка виконана згідно EN 12050-1 або EN 12050-2 (SL1.50) за системою 3.  
(опис завдань третьої сторони відповідно до Додатку V)
  - Номер свідоцтва: LGA-Свідоцтво № 7381115. Перевірка типу і контроль пройдені.
8. НЕ ЗАСТОСОВУЄТЬСЯ.
9. Зазначені технічні характеристики:  
Продукти, що підпадають під цю декларацію, відповідають основним характеристикам і вимогам до робочих характеристик, зазначеним нижче:
  - Стандарти, що застосовувалися: EN 12050-1:2001 або EN 12050-2:2000 (SL1.50).
10. Технічні характеристики продукту, вказані у пунктках 1 і 2, відповідають зазначенім технічним характеристикам з пункту 9.

**CN:****EU产品性能声明，根据欧盟第305/2011号法规  
(建筑用产品法规)附录三的要求提供**

1. 产品类型的唯一识别码：
  - EN 12050-1 或 EN 12050-2 (SL1.50)。
2. 按照第 11 ( 4 ) 条规定应提供的产品类型、批次、序列号或其它可用来识别建筑产品的标识：
  - 铭牌上有 "EN 12050-1 或 EN 12050-2 (SL1.50)" 字样的 SL1, SLV 水泵。
3. 制造商预见的建筑产品用途（与适用的统一技术指标相一致）：
  - 铭牌上有 "EN 12050-1" 字样的、用于抽取含渣废水的水泵。
  - 铭牌上有 "EN 12050-2" 字样的、用于抽取无渣废水的水泵 (SL1.50)。
4. 按照第 11 ( 5 ) 条规定应提供的制造商名称、注册商户名称或注册商标以及地址等信息。
  - Grundfos Holding A/S  
Poul Due Jensens Vej 7  
8850 Bjerringbro  
丹麦
5. 不适用
6. 按照附录五规定应提供的建筑产品性能一致性评估和验证系统：
  - 系统 3。
7. 如果产品性能声明中涉及的某个建筑产品属于某个协调标准的管辖范围：
  - TÜV Rheinland 的 LGA 产品 GmbH, 识别号码 : 0197.
  - 根据 EN 12050-1 或 EN 12050-2 (SL1.50) 的规定在系统 3 的环境中进行了性能测试  
(根据附录五的规定提供了第三方在测试中的任务)  
-证书号码 : LGA 证书号 : 7381115。已通过测试和监控。
8. 不适用
9. 声明的性能：
  - 本产品性能声明中所涉及的产品符合以下标准所规定的主要特性和性能指标：
  - 所用标准 : EN 12050-1:2001 或 EN 12050-2:2000 (SL1.50)。
10. 第 1 点和第 2 点中所认定的产品达到第 9 点中所声明的性能。

**KZ:****305/2011 ережесінің (ЕО) III қосымшасына  
сай ЕО өнімділік туралы декларациясы  
(Құрылыш өнімдері туралы ереже)**

1. Өнім түрінің бірегей идентификациялық коды:
  - EN 12050-1 немесе EN 12050-2 (SL1.50)。
2. Түр, бума, сериялық нөмір немесе құрылыш өнімін 11(4) тармағында сай талап етілгендей құрылыш өнімін идентификациялауга мүмкіндік беретін кез келген басқа элемент:
  - Зауыттық тақтайшасында EN 12050-1 немесе EN 12050-2 (SL1.50) деген белгіленген SL1, SLV сораптары.
3. Құрылыш өнімін максатты пайдалану немесе пайдалану өндіруші көзделгенде тиісті үйлестірілген техникалық сипаттамаларға сай:
  - Зауыттық тақтайшасында EN 12050-1 деген белгіленген нәжісті қамтитын ағынды суды айдамалауга арналған сораптар.
  - Зауыттық тақтайшасында EN 12050-2 (SL1.50) деген белгіленген нәжіс жоқ ағынды суды айдамалауга арналған сораптар.
4. 11(5) тармаққа сай талап етілгендей атау, тіркелиген сауда атауы немесе тіркелиген сауда белгілі және байланыс мекенжайлар:
  - Grundfos Holding A/S  
Poul Due Jensens Vej 7  
8850 Bjerringbro  
Дания.
5. ТИСТІ ЕМЕС.
6. В қосымшасында белгіленгендей жүйені немесе жүйелерді бағалау және құрылыш өнімінің өнімділігінің түркәтүлігін тексеру:
  - 3-жүйе.
7. Құрылыш өніміне кітапты өнімділік туралы декларация үйлестірілген стандартпен қамтылған болса:
  - TÜV Rheinland LGA Products GmbH, идентификациялық нөмір: 0197.  
EN 12050-1 немесе EN 12050-2 (SL1.50) стандартында сай 3-жүйесінен сынақ орындалған.  
(В қосымшасында белгіленгендей үшінші тарап тапсырмаларының сипаттамасы)
  - Сертификат нөмірі LGA-сертификатының нөмірі: 7381115.  
Сыналаган және бакыланған түр.
8. ТИСТІ ЕМЕС.
9. Жарияланған өнімділік:
  - Осы өнімділік туралы декларациямен қамтылған өнімдер төменде сипатталғандай маңызды сипаттамалар және өнімділік туралы стандарттар:
    - Қолданылған стандарттар: EN 12050-1:2001 немесе EN 12050-2:2000 (SL1.50).
10. 1 және 2 белімдерінде көрсетілген өнім өнімділігі 9-белімде жарияланған өнімділікке сай.

1. Mã nhận dạng riêng của loại sản phẩm:  
– EN 12050-1 hoặc EN 12050-2 (SL1.50).
2. Loại, lô hoặc số seri hoặc bất kỳ yếu tố khác cho phép nhận dạng sản phẩm xây dựng chiếu theo yêu cầu trong Điều 11(4):  
– Bơm SL1, SLV được đánh dấu là EN 12050-1 hoặc EN 12050-2 (SL1.50) trên tấm nhôm.
3. Việc sử dụng hay dự tính sử dụng sản phẩm, tương ứng với ứng dụng phù hợp theo đặc điểm kỹ thuật, như dự kiến của nhà sản xuất:  
– Bơm để bơm nước thải có chứa phân được đánh dấu là EN 12050-1 trên tấm nhôm.  
– Bơm SL1.50 để bơm nước thải không chứa phân được đánh dấu là EN 12050-2 trên tấm nhôm.
4. Tên, tên thương mại đã đăng ký hoặc thương hiệu đã đăng ký và địa chỉ liên lạc của nhà sản xuất chiếu theo yêu cầu trong Điều 11(5):  
– Grundfos Holding A/S  
Poul Due Jensens Vej 7  
8850 Bjerringbro  
Đan Mạch.
5. KHÔNG LIÊN QUAN.
6. Hệ thống hoặc các hệ thống đánh giá và thẩm tra sự ổn định của đặc tính hoạt động của sản phẩm quy định tại Phụ lục V:  
– Hệ thống 3.
7. Trong trường hợp bản công bố đặc tính hoạt động liên quan đến một sản phẩm xây dựng được bao gồm bởi một tiêu chuẩn hải hòa:  
– TÜV Rheinland LGA Products GmbH, số nhận diện: 0197.  
Thực hiện kiểm tra theo tiêu chuẩn EN 12050-1 hoặc EN 12050-2 (SL1.50) theo hệ thống 3.  
(mô tả những nhiệm vụ của bên thứ ba như quy định tại Phụ lục V)  
– Giấy chứng nhận số: Giấy chứng nhận LGA Số 7381115.  
Được kiểm tra mẫu và được theo dõi.
8. KHÔNG LIÊN QUAN.
9. Đặc tính hoạt động đã công bố:  
Các sản phẩm được bao gồm trong bản công bố đặc tính hoạt động này phù hợp với các đặc điểm thiết yếu và các yêu cầu đặc tính hoạt động được mô tả trong các tài liệu sau:  
– Tiêu chuẩn được sử dụng: EN 12050-1:2001 hoặc EN 12050-2:2000 (SL1.50).
10. Đặc tính của sản phẩm được xác định trong mục 1 và 2 phù hợp với đặc tính hoạt động đã công bố tại mục 9.

**AL:**

**Deklarata e performancës së BE-së në pajtim me Shtojcën III të Rregullores (BE) Nr 305/2011 (Rregullorja e Produktit të Ndërtimit)**

1. Kodi unik i identifikimit të llojit të produktit:  
–EN 12050-1 ose EN 12050-2 (SL1.50).
2. Lloji, grupi apo numri serial ose çdo element tjetër që lejon identifikimin e produktit të ndërtimit siç kerkohet në zbatim të Nenit 11(4):  
–Pompat SL1, SLV që kanë të shënuar EN 12050-1 ose EN 12050-2 (SL1.50) në targetën e emrit.
3. Përdorimi ose përdorimet e synuara të produktit të ndërtimit, në pajtim me specifikimet teknike të zbatueshme të harmonizuar, siç është parashikuar nga prodhuesi:  
–Pompat për pompimin e ujërave të zeza që përbajnjë materiale fekale që kanë të shënuar EN 12050-1 në targetën e emrit.  
–Pompat SL1.50 për pompimin e ujërave të zeza pa fekale që kanë të shënuar EN 12050-2 në pilakën e emrit.
4. Emri, emri i regjistruar i tregtimit ose marka e regjistruar e tregtimit dhe adresë e kontaktit të prodhuesit siç kerkohet në zbatim të Nenit 11(5):  
–Grundfos Holding A/S  
Poul Due Jensens Vej 7  
8850 Bjerringbro  
Danmarkë.
5. NUK ËSHTË I PËRSHTATSHËM.
6. Sistemi ose sistemet e vlerësimit dhe verifikimit të qëndrueshmërisë së performancës së produktit të ndërtimit siç është përcaktuar në Shtojcën V:  
–Sistemi 3.
7. Në rastin kur deklarata e performancës në lidhje me një produkt ndërtimi që mbulohet nga një standart i harmonizuar:  
–Numri i identifikimit, TÜV Rheinland LGA Products GmbH: 0197.  
Tersti i kryer sipas EN 12050-1 ose EN 12050-2 (SL1.50) nën sistemin 3.  
(përskrimi i detyrave të palës së tretë siç janë përcaktuar në Shtojcën V)  
–Numri i certifikatës: Certifikata LGA Nr. 7381115. I testuar përllojn dhe i monitoruar.  
Tipi i testuar.
8. NUK ËSHTË I PËRSHTATSHËM.
9. Performanca e deklaruar:  
Produktet e mbulura nga ky deklarim i performancës janë në pajtim me karakteristikat thelbësore dhe kërkosat e performancës siç janë përskruar më poshtë:  
–Standartet e përdorura: EN 12050-1:2001 ose EN 12050-2:2000 (SL1.50).
10. Performanca e produktit identifikuar në pikat 1 dhe 2 është në pajtim me performancën e deklaruar në pikën 9.

EU declaration of performance reference number: 96771279.
