

Data sheet

Hydraulic data

Maximum operating pressure p	1.9 bar
Discharge port	DN 100
Free ball passage of the hydraulics	100 mm
Impeller type	Single-channel impeller
Max. immersion depth	20 m
Max. delivery head H_{\max}	17.3 m
Max. volume flow Q_{\max}	278.0 m³/h
Min. fluid temperature T_{\min}	3 °C
Max. fluid temperature T_{\max}	40 °C
Min. ambient temperature T_{\min}	3 °C
Max. ambient temperature T_{\max}	40 °C

Motor data

Motor Identifier	T 17.2-4/24HEX 10kW
Mains connection	3~400 V, 50 Hz
Voltage tolerance	±10 %
Rated power P_2	10 kW
Power consumption $P_{1 \max}$	12.20 kW
Rated current I_N	21 A
Starting current I	41 A
Operating mode (immersed)	S1
Operating mode (non-immersed)	-
Rated speed n	1417 1/min
Power factor $\cos \varphi_{100}$	0.85
Activation type	Star-Delta (YΔ)
Number of poles	4
Max. switching frequency t	15 1/h
Insulation class	H
Protection class motor	IP68

Cable

Connection cable length L	10 m
Cable type	H07RN-F
Cable cross-section	10G1,5 mm²
Type of connection cable	Non-detachable

Equipment/function

Mains plug	no
Float switch	no
Macerator	no
Explosion protection type	ATEX
Motor protection	Bimetall
Motor, leakage detection	yes
Sealing chamber, leakage detection	optional
Leakage chamber, leakage detection	no

Materials

Pump housing	Grey cast iron
Impeller	Grey cast iron
Shaft	Stainless steel
Sealing on pump side	Silicon carbide
Gasket material	NBR
Motor housing	Grey cast iron

Installation dimensions

Inlet connection	DN 150
Outlet connection	DN 100

Pump curves

Fluid media	Water 100 %
Fluid temperature T	20.00 °C
speed at duty point $n_{hydr. @ OP}$	1,450 1/min
Impeller diameter $d_{imp.}$	230 mm

Tender text

Fully submersible sewage pump for vertical wet well installation, for pumping sewage containing faeces, as well as municipal and industrial sewage. Unit made entirely of cast iron; on pump-side seal made of SiC/SiC, seal on the motor side is a rotary shaft seal or mechanical seal. Pressure connection with horizontal

pressure port and flange connection. Surface-cooled motor in three-phase current version with thermal motor monitoring, sealing chamber and Ex rating. As an option, the sealing chamber can be monitored by an external pencil electrode. Longitudinally watertight connection cable with bare cable end.

Operating Data

Product data

Impeller type	Single-channel impeller
Free ball passage of the hydraulics	100 mm
Maximum operating pressure P_N	2 bar
Max. immersion depth	20 m
Fluid temperature T	3 °C

Motor data

Motor design	Submersible motor – surface-cooled
Mains connection	3~400 V, 50 Hz
Voltage tolerance	±10 %
Power factor $\cos \varphi_{100}$	0.85
Rated power P_2	10 kW
Power consumption $P_{1 \max}$	12.20 kW
Rated current I_N	21 A
Starting current I	41 A
Activation type	Star-Delta (YΔ)
Number of poles	4
Rated speed n	1417 1/min
Max. switching frequency t	15 1/h
Insulation class	H
Protection class	IP68
Operating mode (immersed)	S1
Operating mode (non-immersed)	-

Cable

Connection cable length L	10 m
Cable type	H07RN-F
Cable cross-section	10G1,5 mm²
Mains plug	no
Type of connection cable	Non-detachable

Equipment/function

Float switch	no
Macerator	no
Explosion protection type	ATEX
Motor protection	Bimetall
Motor, leakage detection	yes
Sealing chamber, leakage detection	optional
Leakage chamber, leakage detection	no

Materials

Pump housing	Grey cast iron
Impeller	Grey cast iron
Shaft	Stainless steel
Sealing on pump side	QQPGG
Sealing on motor side	NBR
Gasket material	NBR
Motor housing	Grey cast iron

Installation dimensions

Pipe connection on the suction side DNs	DN 150
Pipe connection on the discharge side DNd	DN 100

Ordering information

Brand	Wilo
Product description	EMU FA 10.82-230E + T 17.2-4/24HEx
Net weight, approx. <i>m</i>	147 kg
Article number	6047724 

Installation type

Level control with float switch

Level measurement using a level sensor with various measurement ranges, including high water alarm and dry-running protection.

Communication module GSM (SC)

Signal horn 12-24 VDC	2017208

Flash light

Flash light 1~230 VAC	2551613
Flash light 24 VDC	2551612

Level control with level sensor

Level measurement using a level sensor with various measurement ranges, including high water alarm and dry-running protection. The breakdown barrier and the Ex cut-off relays are not required except for the connection of signal transmitters in potentially explosive areas! These can also be dispensed with when the SC-L..-Ex switchgear is used!

Stationary wet well installation DN 100

Installation drawing

The pumps are immersed in the fluid. Connection to the discharge pipe is normally by a suspension unit. For maintenance purposes, the pumps can be removed from the top of the chamber. There is no need to loosen any screws or drain the water.

For a correct operation of the pumps, it is necessary to know the switching volume. The switching volume is calculated as the difference between the ON and OFF switching points. The OFF-switching point will define by the operating mode for submerged and non-submerged operation of the motor.

Installation example

Installation drawing

The pump is equipped with a pump foot (integrated in the pump housing or separately as an accessory). With this pump foot, the pump can be easily and flexibly installed in any operating space. Hoses are used as discharge pipes. Connection is with a hose nipple or Storz coupling. For a level-dependent operation, it is recommended to use a pump with a float switch.

Services

With Wilo as your partner, you can not only be sure of choosing high-quality product solutions, but also of benefiting from a comprehensive, worry-free package of well thought-out services. We collaborate to develop a service concept tailored to your individual needs; with our expertise and personal consultancy, we make sure that the operation of your systems is as energy-efficient, reliable and economical as possible. All the while our competent Wilo service technicians are ready to assist you with fast, reliable and on-time support.
