The complete solution for low water pressure.

The WaterBoost Advant Slim 2000 Twin combines two 1000-litre WRAS-approved slimline tanks with a DAB Eskybox external variable-speed pump — doubling the storage buffer of the 1000L Slim while keeping the same 600mm slim access. Each tank passes through a standard doorway independently, then links via the supplied tank-to-tank connection kit. Install side-by-side, end-to-end, or in separate rooms.
